Picturing Health and Illness Sander L. Gilman, 1995 A study of visual sources from 19th century textbook illustrations to recent government AIDS posters which finds that the history of our perception of the beautiful body is charged with anxieties about contagion and ugliness It is also entangled with political implications brought about by our interpretation of race as a medical category says Gilman liberal arts and human biology U of Chicago A history both of medicine and of the aestheticization of the body Many bandw illustrations Originally published in Great Britain by Reaktion Books as *Health and Illness Images of Difference* Annotation copyright by Book News Inc Portland OR **Health and Illness** Sander L.

Gilman, 2013-06-01 This timely study demonstrates how images of beauty and ugliness have constructed a visual history that records the artificial boundaries dividing healthy bodies from those that are ill Gilman tells an excellent tale Jewish Chronicle

**Illness and Image** Sander L. Gilman, 2014-09-08 The humanities in higher education are too often labeled as impractical and are not usually valued in today's marketplace Yet in professional fields such as the health sciences interest in what the humanities can offer has increased Advocates claim the humanities offer health care professionals greater insight into how to work with those who need their help *Illness and Image* introduces undergraduates and professionals to the medical humanities using a series of case studies beginning with debates about male circumcision from the ancient world to the present to the meanings of authenticity in the face transplantation arena The case studies address the interpretation of mental illness as a disability and the new category of mental illness self harm Sander L Gilman shows how medicine projects such categories existence into the historical past to show that they are not bound in time and space and therefore are real *Illness and Image* provides students and researchers with models and possible questions regarding categories often assumed to be either trans historical or objective making it useful as a textbook **Images and Empires** Paul Landau, Deborah D.

Kaspin, 2002-10-28 This volume considers the meaning and power of images in African history and culture It assembles a wide ranging collection of essays dealing with specific visual forms including monuments cinema cartoons domestic and professional photography body art world fairs and museum exhibits The Lives of Images Peter Mason, 2001 Examines the history of European representations of non European peoples **Risk and 'The Other'** Hélène Joffé, 1999-09-29 From earthquakes to epidemics AIDS to industrial accidents the mass media continually bring into our daily lives the awareness of risk But how do people respond to this increased awareness How do people cope with living in what has been termed the risk society This book attempts to explain how within a given social and cultural context individuals make sense of impending crisis In particular it tries to explain the phenomenon of a widespread sense of personal invulnerability when faced with risk the not me factor Using a social psychological framework it highlights emotional factors which are a key component of responses to risk but have hitherto been neglected due to the tendency of much work on risk to concentrate almost exclusively on cognitive processing This book will appeal to an international audience of post graduates academics and

researchers in the areas of risk psychology sociology medical anthropology and psychoanalytic studies      **Violence, Care, Cure** Marta-Laura Cenedese, Clio Nicastro, 2025-05-02 This book explores the notions of violence care and cure within the medical encounter and seeks to foreground the ways in which whether individually or as a triad they are prone to ambiguous interpretations The chapters of this book attend to the complex interlacing of these three key terms and what to make of their entanglement by offering historical practical philosophical personal and aesthetic analyses of different medical scenes objects and concepts Besides the three main concepts that give the collection its title the volume deals with bodily experience medical neglect or scepticism pain and suffering diagnosis and recovery and epistemic injustice through the lens of among others biopolitics ethics gender medicine and critical medical humanities Altogether the chapters pay particular attention to the role of images and other narratives including social media platforms The case studies in this collection invite the reader to observe medical encounters that take place in and are shaped by a variety of both material and immaterial spaces from the consulting room to the antechamber of medical bureaucracy and from artistic venues to biopolitical discourses Taken together this book argues that a hermeneutic of violence care and cure is inseparable from individual and collective perceptions of the medical encounter that is it is inextricable from an understanding of the tensions and consensus that surge among perceptions orchestrated by both internal subjective and external social cultural political gazes Moreover the volume aims to provide both directly and indirectly a meta reflection on the disciplines that fall under the umbrella of medical and health humanities interrogating the field's potential to unearth systemic bias to open different possibilities of existence and to make visible the complexity of its research objects as well as to caution against their possible pitfalls By bringing together different methodological approaches this volume provides its readers with conceptual resources for thinking about the intersections of violence care and cure By providing a space where the voices of both emerging and established scholars mingle and respond to one another this book will be essential reading for anyone across the social sciences and humanities interested in the sociology of health and medicine the medical humanities and gender studies      The Disability Studies Reader Lennard J. metonymic body that continues to live in another body through organ replacement and the bodily parts cast in silver and then abandoned in a museum This study also analyzes the discourses of the contemporary body commissioned by the vast industry of mass media This type of body has started to direct itself toward frugal almost furtive pleasures consequently unlike those seriously affected by illnesses a body constantly guarded by fear eventually runs on empty becomes a corps d j vu and thus moves toward different types of minimal and liminal topology The primary works examined include memoirs Marjorie Williams s *Hit by Lightning* A Cancer Memoir Arthur W Frank s *At the Will of the Body* Reflections on Illness Audre Lorde s *The Cancer Journals* films Alejandro Amenabar s *The Sea Inside* Akira Kurosawa s *Ikiru* Pedro Almod var s *All about My Mother* stories Marisa Silver s *Night Train to Frankfurt* visual artworks as accomplished by Jo Spence David Wojnarowicz Felix Gonzales Torres and Natalie Horne and plays Bryony Lavery s *Last Easter* Paula Vogel s *Baltimore Waltz* William Hoffman s *As Is* which are read comparatively namely as works positioned at the intersection between literature visual art and social diaries This book has become part of the collections of the world s leading universities Harvard Princeton Columbia the Library of Congress and more

**Visual Plague** Christos Lynteris, 2022-10-25 How epidemic photography during a global pandemic of bubonic plague contributed to the development of modern epidemiology and our concept of the pandemic In *Visual Plague* Christos Lynteris examines the emergence of epidemic photography during the third plague pandemic 1894 1959 a global pandemic of bubonic plague that led to over twelve million deaths Unlike medical photography epidemic photography was not exclusively or even primarily concerned with exposing the patient s body or medical examinations and operations Instead it played a key role in reconceptualizing infectious diseases by visualizing the pandemic as a new concept and structure of experience one that frames and responds to the smallest local outbreak of an infectious disease as an event of global importance and consequence As the third plague pandemic struck more and more countries the international circulation of plague photographs in the press generated an unprecedented spectacle of imminent global threat Nothing contributed to this sense of global interconnectedness anticipation and fear more than photography Exploring the impact of epidemic photography at the time of its emergence Lynteris highlights its entanglement with colonial politics epistemologies and aesthetics as well as with major shifts in epidemiological thinking and public health practice He explores the characteristics uses and impact of epidemic photography and how it differs from the general corpus of medical
