

# Health is Wealth

Someone has correctly said that 'if health is gone everything is gone'. Life loses interest, in case you are deprived of health. You enjoy neither food nor the world. Even spending time joyfully becomes a big problem. A healthy person (whether rich or poor) lives happier and peaceful life than any rich person having a diseased body. We can, therefore, say that the real wealth of a man is his health.

Health is not merely the absence of disease and infirmity but a state of complete physical, social and mental wellbeing. Health is thus a level of functional efficiency of living beings and the general condition of a person's mind, body and spirit, meaning it is free illness, injury and pain. If you are strong and healthy you can be a shining example to others and teach them how to achieve vibrant health.

To achieve good health, people should follow a healthy lifestyle. People who are not involved in the healthy lifestyle may suffer a range of health disorders like coronary, high blood pressure, heart disease, stroke, diabetes, high cholesterol, kidney problems, liver disorders and so on. To achieve good health, you need very early and consistently early from childhood and old condition.

Health is the great blessing of god. Good health is a matter of good nature. To maintain good health, healthy living and a thoughtful life is a must. We should take care of our health and live this, we should always take a simple and balanced diet. Exercise is very important for

origins of Egypt's civilization and its links with Mesopotamia and the early Hebrews. The book takes a radically alternative view of the rise of high civilization in the Near East and the forces which propelled it. The author Emmet Sweeney finds that the early civilizations developed amidst a background of massive and repeated natural catastrophes, events which had a profound effect upon the ancient peoples and left its mark upon their myths, legends, customs, and religions. Ideas found in all corners of the globe, concepts such as dragon worship, pyramid building, and human sacrifice are shown by Sweeney to have a common origin in the cataclysmic events of the period termed the eruptive age by legendary English explorer Percy Fawcett. Terrified and traumatized by the forces of nature, people all over the world began to keep an obsessive watch on the heavens and to offer blood sacrifices to the angry sky gods. These events, which are fundamental to any understanding of the first literate cultures, have nonetheless been completely effaced from the history books and an official history of mankind which is little more than an elaborate fiction now graces the bookshelves of the world's great libraries. Starting with clues unearthed by history sleuth Immanuel Velikovsky and others, Emmet Sweeney takes the investigation further. While the Near Eastern civilizations are generally considered to have taken shape around 3300 BC, about 2,000 years before those of China and the New World, Ages in Alignment demonstrates that they had no 2,000-year head start. All the ancient civilizations arose simultaneously around 1300 BC in the wake of a terrible natural catastrophe recalled in legend as the Flood or Deluge. Sweeney points out that the presently accepted chronology of Egypt is not based on science but on venerated literary tradition. This chronology had already been established in its present form by the third century BC when Jewish historians, utilizing the History of Egypt by the Hellenistic author Manetho, sought to tie in Egypt's history with that of the Bible. Apparent gaps and weird repetitions resulted. Improbable feats like the construction of major cut stone engineering projects before the advent of steel tools or Pythagorean geometry point to the weaknesses of the traditional view. Taking a more rigorous approach and pointing to solid evidence, Emmet Sweeney shows where names overlap and where one and the same group is mistaken for different peoples in different times.

Volume 1: The Genesis of Israel and Egypt looks at the archaeological evidence for the Flood, evidence now misinterpreted and ignored. This volume examines the rise of the first literate cultures in the wake of the catastrophe and goes on to trace the story of the great migration which led groups of early Mesopotamians westward toward Egypt, where they helped to establish Egyptian civilization. This migration, recalled in the biblical story of Abraham, provides the first link between Egyptian and Hebrew histories. The next link comes a few generations later with Imhotep, the great seer who solved the crisis of a seven-year famine by interpreting Pharaoh Djoser's dream. Imhotep is shown to be the same person as Joseph, son of Jacob.
