Health And Social Needs Of Young Adults With Physical Disabilities:

The Health and Social Needs of Young Adults with Physical Disabilities Andrew Thomas, Martin Bax, Diane Smyth, 1989 This book addresses a topic that has received surprisingly little attention to date the health and social needs of young adults with physical disabilities Following an extensive review of the contemporary literature on the subject the authors report an in depth study on a large sample of physically disabled 18 to 25 year olds living in two survey areas one urban and one semirural The study which included pediatric examinations and interviews by a social psychologist found that a large proportion of subjects face social and medical problems for instance They have serious health needs that are not being met by the statutory services they left school with less than adequate skills to enable them to lead an independent adult life they are without a daytime occupation or attend day centers that are described as unstimulating places they do not receive all the financial benefits to which they are entitled they are isolated from their peers and lack the social skills to interact with others in a positive and successful way Parents and guardians were also found to receive little physical or emotional support These findings underline the need for a better system of providing and coordinating services for this client group and the authors call for the formation within each local health authority area of an Adult Disability Service that would have a clinical and planning role in terms of health care and that would act as a linchpin in the coordination of health educational social and voluntary services Although this work relates specifically to service provision in the United Kingdom it is felt that the conclusions and recommendations are also broadly applicable to the situation in other countries *The Health and Social Needs of Young Adults with Physical Disabilities* Andrew P. Thomas, Martin Bax, Diane P. L. Smyth, 1989

Handbook of Neurological Rehabilitation Richard J. Greenwood, Thomas M. McMillan, Michael P. Barnes, Christopher D. Ward, 2005-08-16 Provides an invaluable resource for all professions that work with patients suffering from neurological disorders *Routledge Handbook of Youth and Young Adulthood* Andy Furlong, 2016-10-14 The second and completely revised edition of the Routledge Handbook of Youth and Young Adulthood draws on the work of leading academics from four continents in order to introduce up to date perspectives on a wide range of issues that affect and shape youth and young adulthood It provides a multi disciplinary overview of a dynamic field of study that offers unique insights on social change in advanced societies It is aimed at researchers policy makers and advanced students on a global level The Handbook introduces the main theoretical perspectives used within youth studies and sets out future research agendas Each of the ten sections covers an important area of research from education and the labour market to youth cultures health and crime discussing change and continuity in the lives of young people introducing readers to some of the most important work in the field while highlighting the underlying perspectives that have been used to understand the complexity of modern youth and young adulthood Exploring Disability Colin Barnes, Geof Mercer, 2018-05-21 The second edition of this widely used text has been carefully rewritten to ensure that it is up to date with cutting edge debates evidence and policy changes Since the

book's initial publication there has been an expansion of interest in disability in the social sciences and disability has come to play an increasingly prominent role in political debates. The new edition takes account of all these developments and also gives greater emphasis to global issues in order to reflect the increasing and intensifying interdependence of nation states in the twenty-first century. The authors examine amongst other issues the changing nature of the concept of disability, key debates in the sociology of health and illness, the politicisation of disability, social policy and the cultural and media representation of disability. As well as providing an excellent overview of the literature in the area, the book develops an understanding of disability that has implications for both sociology and society. The second edition of *Exploring Disability* will be indispensable for students across the social sciences and in health and social care who really want to understand the issues facing disabled people and disabling societies.

Running a Team for Disabled Children and Their Families

Martin F. Robards, 1994-06-24. Children with multiple disabilities and complex neurological problems often compounded by psychological and behavioral problems need care provision beyond the normal community and hospital pediatric services. These children and their families need the help of a variety of specialists. Organizing these is a complex problem and there is a constant risk of the family's needs being overridden by the professionals' convenience. Dr Robards describes ways of providing all the necessary specialist care while at the same time increasing the family's participation and understanding to its optimum level. Illustrating his proposals with a variety of lively case histories, the author demonstrates that a rigid structure can never meet these children's needs. This practical book offers clear recommendations about record keeping, integrating voluntary support groups into the professionals' work, the location and layout of premises used by the professionals and many other factors collectively critical to the efficient and humane delivery of this element of community care.

The Voice Of The Child Graham Upton, Ved Varma, 2003-09-02. This collection provides a guide to the legal requirements surrounding children's rights. The book discusses the practicalities and problems of listening to the child in educational, social and health settings.

Otitis Media with Effusion in Children David Chalmers, Ian Stewart, 1989. Otitis media with effusion (OME) is one of the most common diseases of childhood yet its long-term effects are only just beginning to be appreciated. Following a comprehensive review of the literature, David Chalmers and his co-authors detail a longitudinal multidisciplinary study of over 1000 New Zealand children enrolled at three years and followed to age eleven. The changing prevalence of OME in the sample is described; evidence on a wide range of risk factors is examined; the problems of chronic perforation of the tympanic membrane, cholesteatoma and otological complications of surgical therapy are evaluated and the developmental consequences of OME are traced over time. Early onset of bilateral OME is shown to have long-lasting consequences for language development, speech articulation, reading ability and classroom behavior. The authors conclude from these results that there is an urgent need for the detection and management of early onset OME.

Quadruplets and Higher Multiple Births Marie M. Clay, 2011-12-14. The advent of hormonal infertility treatments and in vitro fertilization

techniques have led to a sharp increase in the number of quadruplet and higher order conceptions in recent years Improved neonatal care and nutrition have meant that many more of these babies survive Yet it appears that very little research has been done into the lives of such children and the psychodevelopmental consequences of their multiple status In this book Marie M Clay brings together what is known from historical records and reports in the medical psychological and popular press She points to the contribution that research studies on higher multiple sets could make to our understanding of genetic environmental interactions and gives valuable methodological advice for those wishing to initiate such a study Changes in social practices and medical knowledge are highlighted various aspects of pregnancy and birth are discussed and the practical and emotional problems faced by families of multiple sets are sensitively described Appended to the book are an illustrated Catalog of quadruplet case reports gleaned from the literature including birth details and postnatal histories plus a directory of multiple birth associations support groups and study centers around the world

Management of Visual Impairment in Childhood Alistair Fielder,Anthony Best,Martin C. O. Bax,1993-11-18 Management of visual impairment in childhood requires input from such a wide range of medical and nonmedical disciplines that the delivery of coordinated and appropriate care presents serious problems This book is a practical guide to the day to day management of children with this difficult problem Written in accessible language with a minimum of jargon it is intended for both a medical and nonmedical audience pediatricians ophthalmologists optometrists educators and social workers The authors cover a wide range of topics including the epidemiology of childhood blindness prevention visual assessment in early life the ophthalmic and neurological causes of visual impairment the effects of impairment on development behavior and the family community and ophthalmic management management of the multiply impaired child access to the educational curriculum and the challenge of technology
