Pittard III,2013-12-18 Well child care is designed to promote optimal health status for children including school and life success This preventive care includes anticipatory guidance continuity of care assessment of growth and development screening procedures for vision hearing dental and cognitive development and immunizations Anticipatory guidance provides parental health education counseling and reassurance The vast majority of Medicaid insured children receive fewer than the American Academy of Pediatrics AAP recommended number of well child visits in the preschool years and a disproportionate number of children have poor health and lack school readiness With little empirical data available indicating clinical effectiveness other than for immunizations the AAP recommendations for well child care were originally based on consensus expert opinion and more than three decades later documentation of effectiveness remained unavailable This information gap led policymakers to question the value of well child care and limited incentive to correct its underuse Only in the last five years have experimental findings indicated an association between well child care and both more cost efficient health care and increased school readiness Awareness of these findings by insurance company and Medicaid administrators is limited The purpose for this book is to increase awareness by all stakeholders of the empirically determined clinical effectiveness of well child care The short term goal is to facilitate increased utilization of well child care with a longer term goal of improved child health and life success Well-Child Care in Infancy William B. Pittard III, MD, PhD, MPH,2016-01-30 Experimental findings have indicated an association between well child care and cost efficient health care and increased school readiness But insurance companies and Medicaid administrators sometimes aren't aware of the findings which is why a book on well child care is so necessary William Pittard a longtime medical doctor who has spent

America's health care system is being reshaped by a variety of market driven changes and states are emerging as the major governmental influence on health care policy Amid these changes the health and well being of children can slip from view Although most children are fundamentally healthy they require health care that emphasizes preventive services such as immunizations and regular monitoring of physical and psychosocial growth and development This volume takes a broad look at access and quality of care for pregnant women children and mothers Among the issues addressed are the scope of benefits available under various health care reform efforts and services for special needs children under managed care

*Listening to Children and Young People in Healthcare Consultations* Sarah Redsell, Adrian M. Hastings, 2010 The involvement of children and young people in consultations about aspects of their health or illness is often limited with their role in diagnosis and decision making on treatment options secondary to that of parents or carers However research shows that most children and young people want greater involvement that this can both improve their understanding of their illness and positively influence healthcare outcomes Policy recommendations increasingly require health professionals to involve children and young people in healthcare but there is little available guidance on building the knowledge and skills needed to do so effectively This book meets that need including an overview of the particular issues involved and providing structured guidance for different types of consultations including children with learning difficulties disabled children and children as carers Edited by eminent researchers and with highly experienced contributors this book is an invaluable resource for GPs and GP registrars paediatric and emergency consultants and specialist registrars nurses paramedics healthcare educators and trainees and all those who work with children and young people in health related contexts

**Systems: Lessons without Borders** Ingrid Wolfe, Martin McKee, 2014-02-16 The book will focus on three key aspects of delivery of child health services: service integration and coordination, public health measures, and enhancing the quality of care for children. Taking a child-centric view on understanding how health services and systems work, the book aims to contribute towards improving children's health through deepening the understanding of children's health services. Focusing primarily on the western European countries, the book draws on research conducted with child health leaders in ten countries: Austria, Britain, Finland, France, Israel, Italy, Netherlands, Norway, Poland, and Sweden. The chapters include clinical scenarios designed to help identify and describe the various ways in which children and their families negotiate health services when dealing with twelve different conditions. Using clinical scenarios in this way allows the book authors to capture the diverse aspects of each health system as well as assessment and analysis of the challenges involved in each and their successes and failures.
