The Effects of Political Institutions on Varieties of Capitalism Matthew P. Arsenault, 2017-02-10 This book identifies and explores the mechanisms linking political institutions and variation in capitalist systems A strong correlation exists between varieties of political regimes and varieties of capitalism majoritarian political regimes are correlated with liberal market economies LMEs and consensus political regimes are correlated with coordinated market economies CMEs Still correlation is not causation Empirical findings illustrate that partisanship and policy legacies the number of political parties electoral rules and constitutional constraints are significant indicators of LMEs and CMEs Arsenault finds that majoritarian institutions create an environment of adversarial politics and strong competition between actors which makes credible commitment to nonmarket coordination mechanisms unlikely Consensus institutions on the other hand promote an atmosphere of cooperation and coordination between actors thus encouraging credible commitment to nonmarket coordination mechanisms Qualitative case studies of Germany Britain and New Zealand confirm the quantitative findings and suggest that political regimes were instrumental in shaping the economic adjustment paths of these countries during the era of liberalization in the 1980s

**Remaking New Zealand and Australian Economic Policy** Shaun Goldfinch, 2000 During the 1980s and early 1990s both Australia and New Zealand extensively deregulated their economies moving to become amongst the most liberal economies in the OECD Shaun Goldfinch interviewed more than 180 leading policy makers in Australia and New Zealand including former prime ministers ministers of finance treasurers public servants and other policy elites and examined primary government sources to demonstrate the reasons and processes involved in this remarkable period of economic reform This major comparative study sheds new light on economic policy making and change including the role of economic ideas and the importance of institutions and policy communities It contrasts the crash through approach that characterised reform in New Zealand with the bargained consensus that underpinned changes in Australia Finally it asks the critical question Has the New Zealand approach to policy change delivered better policy outcomes

**Global Capital, Political Institutions, and Policy Change in Developed Welfare States** Duane Swank, 2002-02-11 This book argues that the dramatic post 1970 rise in international capital mobility has not systematically contributed to the retrenchment of developed welfare states as many claim Nor has globalization directly reduced the revenue raising capacities of governments and undercut the political institutions that support the welfare state Rather institutional features of the polity and the welfare state determine the extent to which the economic and political pressures associated with globalization produce Welfare state retrenchment

**Neoliberal Labour Governments and the Union Response** J. Schulman, 2015-05-28 A cross country comparison of recent Labour Party governments in New Zealand Britain and Australia and an exploration of how those countries labour movements responded to their parties neoliberal policies in power

**Third Way Reforms** Jingjing Huo, 2009-04-27 This book examines the transformation of contemporary social democracy through the concept of third way reforms It proposes a set of theories about the possibility for continuing social democratic ideological adaptation for ideologies to overcome institutional constraints in triggering path breaking innovations and for social democracy to bridge the insider outsider divide Empirically the book utilizes these theories to account for social democratic welfare state and labor market reforms in nine OECD countries after the end of the Golden Age Based on the logic of public evils the book proposes that the ideologically contested nature of institutions provides incentives for institutional innovation Social democratic ideology shapes the fundamental characteristics and content of the third way policy paradigm and the paradigm s practical implementation continues to be path dependent on historical institutional settings

**Suiting Themselves** Sharon Beder, 2012 In this brilliantly researched expos communications Rottweiler Sharon Beder blasts open the backrooms and boardrooms to reveal how the international corporate elite dictate global politics for their own benefit Beder shows how they created business associations and think tanks in the 1970s to drive public policy forced the worldwide privatization and deregulation of public services in the 1980s and 1990s enabling a massive transfer of ownership and control over essential

services and still not satisfied have worked relentlessly since the late 1990s to rewrite the very rules of the global economy to funnel wealth and power into their pockets. Want a globalized and homogenized world of conflict, poverty and massive environmental degradation run by a corporate oligarchy that wipes its feet on democracy? Or a democratic world where poverty is history, companies work for people and clean water is a right, not a privilege you pay for? Beder's message is clear: it's your world and it's time to fight for it.

**International Social Policy** Pete Alcock, Gary Craig, 2009-03-24. The second edition of this textbook provides an accessible and structured look at social policy in a global comparative context. With detailed explanations of the historical, political and social context of policy developments across thirteen nations, the book offers an authoritative picture of social policy across the developed world. The book considers core areas of policy provision alongside contemporary international concerns such as globalisation, demographic change and economic reform. Specifically, it examines policy in the following nations: USA, Canada, Australia, New Zealand, UK, Sweden, Germany, Italy, Russia, Japan, South Korea, China, South Africa. Written and edited by leading social policy experts in each country, this is an invaluable contribution to the study of global social policy and an indispensable resource for students, researchers and policy makers.

**Staff Participation and Public Management Reform** D. Farnham, A. Hondeghem, S. Horton, 2005-06-07. This book explores the role of civil servants and their trade unions in the public management reform process, framing it in its economic, social, cultural and legal contexts. Building on neo-institutional and stakeholder theories, the book shows how staff and their representative organisations have influenced the formulation and implementation of public management reforms in twelve OECD countries. This study challenges top-down elite theories that have dominated the existing literature, explaining how staff participation practices, both direct and indirect, have impacted on the implementation of reforms in different ways in different countries. The book concludes that variations in staff participation in the reform process depend upon institutional and political factors and the distribution of power in the employment relationship.

**Families, Labour and Love** Maureen Baker, 2020-07-29. We think of our family life as very personal, but in fact it is shaped by influences well beyond our control. *Families, Labour and Love* identifies the ways in which family and personal life in three settler societies—Australia, New Zealand and Canada—has been shaped by colonisation, immigration, globalisation, demographic changes, law and policy. Baker shows that these three countries, each a former colony, developed similar family trends and similar family policies. Strongly gendered patterns of paid and unpaid work played a major role in family life. The family practices of indigenous people were largely overlooked, as were those of recent immigrant groups. However, local conditions also produced significant differences in family experiences among the three countries. Richly illustrated with examples, comparative data and textual sources, *Families, Labour and Love* provides a broad-ranging analysis of the family which will appeal to students, researchers and

policy makers Maureen Baker outlines with great clarity the diversity of families and the way in which they are shaped by historical and cultural forces The focus on Australia New Zealand and Canada is not only refreshing but throws into sharp relief the impact on contemporary families of the colonial experience industrialisation large scale immigration and globalisation David de Vaus La Trobe University

**International Student Policy in Australia** Professor Gaby Ramia, 2024-10-01 Australia's higher education sector was hit hard by the COVID 19 pandemic Student and staff numbers declined and the government assistance afforded to other sectors was all but missing for universities In a callous example of abandonment in an hour of need Australia's international students were similarly ignored by the federal government International Student Policy in Australia The welfare dimension tells the story of how successive governments have chosen a conscious form of what is effectively policy inaction on international student welfare since well before COVID 19 The politics of policy during the pandemic is a significant part of the narrative but it only tells part of the story International Student Policy in Australia examines the policies and laws that regulate the lives of international students in Australia Professor Gaby Ramia examines the political policy governance and regulatory contexts within which international student rights and welfare are determined in Australia and interrogates specific thematic areas including racism discrimination and violence health and wellbeing and the means by which students have dealt with crisis situations over the past 20 years International Student Policy in Australia The welfare dimension provides an analysis of international student welfare amid questions of policy action and inaction in the management of multiple crises within an era of massified international education drawing implications for policy and legal reform and providing a revised policy agenda for a post pandemic future

**The Welfare State in**

**Post-Industrial Society** Jason L. Powell, Jon Hendricks, 2009-06-10 In recent years major social forces such as ageing populations social trends migration patterns and the globalization of economies have reshaped social welfare policies and practices across the globe Multinational corporations NGOs and other international organizations have begun to influence social policy at a national and local level Among the many ramifications of these changes is that globalizing influences may hinder the ability of individual nation states to effect policies that are beneficial to them on a local level With contributions from thirteen countries worldwide this collected work represents the first major comparative analysis on the effect of globalization on the international welfare state The Welfare State in Post Industrial Society is divided into two major sections the first draws from a number of leading social welfare researchers from diverse countries who point to the nation state as case studies highlighting how it goes about establishing and revising social welfare provisions The second portion of the volume then moves to a more global perspective in its analysis and questioning of the impact of globalization on citizenship ageing and marketization The Welfare State in Post Industrial Society seeks to encourage debate about the implications of the most pressing social welfare issues in nation states and integrate analyses of policy and practice in particular countries struggling to provide social welfare support for their needy populations
