great loss BOOK JACKET *The Great Fire of London of 1666* Magdalena Alagna, 2003-12-15 Recounts the events leading up to the 1666 fire that destroyed most of London tracing its course and aftermath as well as the city's recovery *The Great Fire of London* Sarah Machajewski, 2015-07-15 In September 1666 a small fire broke out at the king's bakery in London England in the early morning Several fateful factors worked together to turn this small blaze into a catastrophic conflagration that changed the city forever This riveting account of a city set ablaze is supported by primary sources such as maps diaries and royal proclamations Readers will be fascinated by old fashioned firefighting techniques and people's reactions as the fire spread and burned for days Images of London on fire will ignite their imaginations and further enable them to understand this era and setting in European history **The Great Fire of London** Charles River Charles River Editors, 2018-02-13 Includes pictures Includes accounts of the fire written by survivors and government officials Includes a bibliography for further reading A wooden northern and inartificial congestion of Houses John Evelyn's description of London before the fire So I was called for and did tell the King and Duke of York what I saw and that unless His Majesty did command houses to be pulled down nothing could stop the fire They seemed much troubled and the King commanded me to go to my Lord Mayor from him and command him to spare no houses but to pull down before the fire every way Samuel Pepys In the 17th century the people of London could boast that they had developed some of the most advanced firefighting technology and methods in the world including the use of primitive fire engines There were even vendors of such machines who advertised in papers of their machines abilities to quench great fires Of course even with trained firefighters and new devices the most skillful efforts could still prove limited in the face of a giant fire as Rome had learned over 1500 years earlier and as Chicago would learn nearly 200 years later In fact one of the primary reasons London developed ways to fight fires was the fact that the city was particularly vulnerable Although London was over 1500 years old and sat at the heart of the British Empire most of the buildings were made of wood and the city was overcrowded in part due to the fact that city planners worked with and around the ancient Roman fortifications that had been constructed to defend it As such while there were spacious areas for the elite and rich outside of the city London itself had narrow streets full of wood buildings that were practically on top of each other With some bad luck and bad timing a potential disaster awaited the city and that finally came in September 1666 As it turned out the Great Fire of London was so bad that one author who studied the blaze described it as the perfect fire referring to the convergence in the largest city in England of spark wood and wind in such a way that no one could stop the fire or even fight it effectively John Evelyn who had warned of the potential for a devastating fire given the layout of the city noted that people seemed so stunned by the scope of the fire that they didn't know what to do The conflagration was so universal and the people so astonished that from the beginning I know not by what despondency or fate they hardly stirred to quench it so that there was nothing heard or seen but crying out and lamentation running about like distracted creatures without at all attempting to save even their goods such a strange consternation there was upon them

While the fire quickly spread throughout the heart of the city the only thing that saved London's suburbs was an ancient wall built around the city to keep the enemies of Rome out not the fire in By the time it was finished most of the city's homes and churches lay in ashes and nearly 90% of the city's citizens were left homeless The only consolation taken away from the devastation was an astonishing low death rate although London had about 80 000 residents only a handful died as the fire raged across the city The fire lasted three days and by the end of it Londoners were shocked by the wide scale destruction which was so great that Samuel Pepys remarked It made me weep to see it In the aftermath people looked for scapegoats ranging from King Charles II to the Pope and his Catholic supporters while England's leaders looked to rebuild the city The civil and foreign strife ultimately posed obstacles to new plans to rebuild London which actually meant that the rebuilding efforts were designed in ways that mimicked the old layout that had invited such a disaster in the first place
