## **Great Gulf Fishermen Scientists And The Struggle To Revive The Worlds Greatest Fishery:**

*The Great Gulf* David Dobbs, 2000-10 For hundreds of years the New England cod fishery was one of the most productive in the world with higher average annual landings than any comparable ocean area But in the late 1980s fish catches dropped precipitously as the cod flounder and other species that had long dominated the region seemed to lose their ability to recover from the massive annual harvests Even today with fishing sharply restricted populations have not recovered Largely overlooked in this disaster is the intriguing human and scientific puzzle that lies at its heart an anguished seemingly inexplicable conflict between government scientists and fishermen over how fish populations are assessed which has led to bitter disputes and has crippled efforts to agree on catch restrictions In *The Great Gulf* author David Dobbs offers a fascinating and compelling look at both sides of the conflict With great immediacy he describes the history of the fisheries science in this most studied of oceans and takes the reader on a series of forays over the Gulf of Maine and Georges Bank on both fishing boats and research vessels He introduces us to the challenges facing John Galbraith Linda Despres and Jay Burnett passionate and dedicated scientists with the National Marine Fisheries Service who spend countless hours working to determine how many fish there really are and to the dilemma of Dave Goethel a whipsmart conscientious fisherman with 20 years s experience who struggles to understand the complex world he works in while maintaining his livelihood in an age of increasing regulation Dobbs paints the New England fishery problem in its full human and natural complexity vividly portraying the vitality of an uncontrollable ultimately unknowable sea and its strange frightening and beautiful creatures on the one hand and on the other the smart irrepressible unpredictable people who work there with great joy and humor refusing to surrender to the many reasons for despair or cynicism For anyone who read *Cod* or *The Perfect Storm* this book offers the next chapter of the story how today s fishers and fisheries scientists are grappling with the collapse of this fishery and trying to chart amid uncertain waters a course towards its restoration

*The Lobster Coast* Colin Woodard, 2005-04-26 A thorough and engaging history of Maine s rocky coast and its tough minded people Boston Herald A well researched and well written cultural and ecological history of stubborn perseverance USA Today For more than four hundred years the people of coastal Maine have clung to their rocky wind swept lands resisting outsiders attempts to control them while harvesting the astonishing bounty of the Gulf of Maine Today s independent self sufficient lobstermen belong to the communities imbued with a European sense of ties between land and people but threatened by the forces of homogenization spreading up the eastern seaboard In the tradition of William Warner s *Beautiful Swimmers* veteran journalist Colin Woodard author of *American Character A History of the Epic Struggle Between Individual Liberty and the Common Good* traces the history of the rugged fishing communities that dot the coast of Maine and the prized crustacean that has long provided their livelihood Through forgotten wars and rebellions and with a deep tradition of resistance to interference by people from away Maine s lobstermen have defended an earlier vision of America while defying the tragedy of the commons the notion that

people always overexploit their shared property Instead these icons of American individualism represent a rare example of true communal values and collaboration through grit courage and hard won wisdom      **Vanishing Species** Susan R. Playfair,2005-03-07 The story of the ongoing debate between the New England communities of fishermen federal regulators scientists and environmentalists      **Fish Sticks, Sports Bras, & Aluminum** Paul R. Josephson,2021-04-27 A revealing look at the history politics and social meanings behind everyday objects Who would have guessed that the first sports bra was made out of two jockstraps sewn together or that it succeeded because of federal anti discrimination laws What do simple decisions about where to build a road or whether to buy into the carbon economy have to do with Hurricane Katrina or the Fukushima nuclear disaster How did massive flood control projects on the Mississippi River and New Deal dams on the Columbia River lead to the ubiquity of high fructose corn syrup And what explains the creation and continued popularity of the humble fish stick In Fish Sticks Sports Bras and Aluminum Cans historian Paul R Josephson explores the surprising origins political contexts and social meanings of ordinary objects Drawing on archival materials technical journals interviews and field research this engaging collection of essays reveals the forces that shape and are shaped by everyday objects Ultimately Josephson suggests that the most familiar and comfortable objects sugar and aluminum for example which are inextricably tied together by their linked history of slavery and colonialism may have the more astounding and troubling origins Students of consumer studies and the history of technology as well as scholars and general readers will be captivated by Josephson s insights into the complex relationship between society and technology Josephson s conclusions are guaranteed to make you think of the modern world and its interconnectedness in a different light Cosmos Every chapter of this book offers surprising insights and is a pleasure to read ICON      **Shakespeare's Ocean** Dan Brayton,2012-04-12 Study of the sea both in terms of human interaction with it and its literary representation has been largely ignored by ecocritics In Shakespeare s Ocean Dan Brayton foregrounds the maritime dimension of a writer whose plays and poems have had an enormous impact on literary notions of nature and in so doing plots a new course for ecocritical scholarship Shakespeare lived during a time of great expansion of geographical knowledge The world in which he imagined his plays was newly understood to be a sphere covered with water In vital readings of works ranging from The Comedy of Errors to the valedictory The Tempest Brayton demonstrates Shakespeare s remarkable conceptual mastery of the early modern maritime world and reveals a powerful benthic imagination at work      **Correction Lines** Curt Meine,2013-04-10 The last fifteen years have been a period of dramatic change both in the world at large and within the fields of ecology and conservation The end of the Cold War the dot com boom and bust the globalizing economy and the attacks of September 11 among other events and trends have reshaped our worldview and the political environment in which we find ourselves At the same time emerging knowledge needs and opportunities have led to a rapid evolution in our understanding of the scientific foundations and social context of conservation Correction Lines is a new collection of essays from one of our most thoughtful and

eloquent writers on conservation putting these recent changes into perspective and exploring the questions they raise about the past present and future of the conservation movement The essays explore interrelated themes the relationship between biological and social dimensions the historic tension between utilitarian and preservationist approaches the integration of varied cultural perspectives the enduring legacy of Aldo Leopold the contrasts and continuities between conservation and environmentalism the importance of political reform and the need to retool conservation to address twentyfirst century realities Collectively the essays assert that we have reached a critical juncture in conservation a correction line of sorts Correction Lines argues that we need a more coherent and comprehensive account of the past if we are to understand our present circumstances and move forward under unprecedented conditions Meine brings together a deep sense of history with powerful language and compelling imagery yielding new insights into the origins and development of contemporary conservation Correction Lines will help us think more clearly about the forces that have changed and are changing conservation and inspire us to address current realities and future needs

**Coastal-Marine Conservation** G. Carleton Ray, Jerry McCormick-Ray, 2009-04-01 Coastal Marine Conservation Science and Policy introduces students and managers to complex conservation and management issues facing coastal nations of the world their citizens and international and non governmental organizations It aims to reduce complexity and inspire a greater consensus for more effective conservation action Presents the coastal realm as a heterogeneous diverse ecosystem of exceptional high biological diversity and productivity and where conservation challenges are most difficult and urgent Examines the critical issues facing coastal marine conservation and the mechanisms for dealing with them Reviews the basic science required for addressing conservation issues by presenting the coastal realm as a land sea ecosystem of global significance and by reviewing the natural history features of coastal marine organisms Presents three ecologically and latitudinally distinct real world case studies to create a context for understanding of regional systems their cultures and their conservation the polar Bering Sea the temperate Chesapeake Bay and the tropical Bahamas Makes apparent the ecological stresses on the coastal realm increasing rates of ecosystem change loss of ecosystem health and fragmented governance Synthesizes the major challenges for conservation and suggests future policy and management strategies including ecosystem management and needs for achieving sustainability and addressing the environmental debt This book is intended for undergraduates and graduates taking courses in coastal and marine conservation and management as well as those actively engaged in coastal marine conservation activities and gives the reader a clear steer to future management approaches References additional to those in the book are available at [http://www.blackwellpublishing.com/pdf/ra\\_References.pdf](http://www.blackwellpublishing.com/pdf/ra_References.pdf) The artwork is available to download at <http://www.blackwellpublishing.com/ra>

**The Mortal Sea** W. Jeffrey Bolster, 2012-10-08 Since the time of the Vikings the Atlantic has shaped the lives of people who depend on it for survival and people have shaped the Atlantic In his account of this interdependency Bolster a historian and professional seafarer takes us through a millennium long environmental history

of our impact on one of the largest ecosystems in the world      *The Unnatural History of the Sea* Callum Roberts, 2009-01-05  
Humanity can make short work of the oceans creatures In 1741 hungry explorers discovered herds of Steller s sea cow in the Bering Strait and in less than thirty years the amiable beast had been harpooned into extinction It s a classic story but a key fact is often omitted Bering Island was the last redoubt of a species that had been decimated by hunting and habitat loss years before the explorers set sail As Callum M Roberts reveals in *The Unnatural History of the Sea* the oceans bounty didn t disappear overnight While today s fishing industry is ruthlessly efficient intense exploitation began not in the modern era or even with the dawn of industrialization but in the eleventh century in medieval Europe Roberts explores this long and colorful history of commercial fishing taking readers around the world and through the centuries to witness the transformation of the seas Drawing on firsthand accounts of early explorers pirates merchants fishers and travelers the book recreates the oceans of the past waters teeming with whales sea lions sea otters turtles and giant fish The abundance of marine life described by fifteenth century seafarers is almost unimaginable today but Roberts both brings it alive and artfully traces its depletion Collapsing fisheries he shows are simply the latest chapter in a long history of unfettered commercialization of the seas The story does not end with an empty ocean Instead Roberts describes how we might restore the splendor and prosperity of the seas through smarter management of our resources and some simple restraint From the coasts of Florida to New Zealand marine reserves have fostered spectacular recovery of plants and animals to levels not seen in a century They prove that history need not repeat itself we can leave the oceans richer than we found them

**Ecocritical Shakespeare** Lynne Bruckner, Dan Brayton, 2016-04-29 Can reading writing about and teaching Shakespeare contribute to the health of the planet To what degree are Shakespeare s plays anthropocentric or ecocentric What is the connection between the literary and the real when it comes to ecological conduct This collection engages with these pressing questions surrounding ecocritical Shakespeare in order to provide a better understanding of where and how ecocritical readings should be situated The volume combines multiple critical perspectives juxtaposing historicism and presentism as well as considering ecofeminism and pedagogy and addresses such topics as early modern flora and fauna and the neglected areas of early modern marine ecology and oceanography Concluding with an assessment of the challenges and necessities of teaching Shakespeare ecocritically *Ecocritical Shakespeare* not only broadens the implications of ecocriticism in early modern studies but represents an important contribution to this growing field      *Threats to Our Ocean Heritage: Bottom Trawling* Charlotte Jarvis, 2024-05-13 This open access book focuses on the destruction of our Ocean Heritage from bottom trawling It brings together the natural and cultural sides of the marine environment to further our understanding of the importance of this heritage how it is threatened by activities such as bottom trawling and provides recommendations such as a moratorium in particularly vulnerable areas that are currently unprotected It is a unique publication in integrating cultural heritage into a discussion where the primary focus has been the destruction of natural heritage The book is divided

into three sections that discuss respectively the international legal context history and ecological impact of bottom trawling case studies highlighting the impact of these destructive activities on underwater cultural heritage and finally recommended future steps and how to use the damage presented here to halt future devastation This book is a valuable tool for resource managers and representatives of governments and international organizations in their efforts to establish the moratoria called for This book is also of interest to educators archaeologists and practitioners working in the field of underwater cultural heritage This is an open access book

*The Restoration Economy* Storm Cunningham,2002-11-02 A landmark work I was relieved to see that there is a good and reasonable solution to the ruinous policies of unbridled new development Mark Stewart CEO iAccess Communications The Restoration Economy reveals the previously undocumented trillion dollar global industries that are restoring our natural and manmade environments Restorative development is rapidly overtaking new development because we are running out of things to develop Most natural areas are already either farmed or degraded and cities have built all the way to their borders However there is no lack of things to redevelop and restore Storm Cunningham surveys the wide range of restoration industries and points out the connections among them He shows for example how the restoration of a river ecosystem can have a major impact on the commercial success of a redeveloped historic urban waterfront Written for a broad range of audiences The Restoration Economy is an entertaining blend of business science and economics that details exciting new business and investment opportunities in this dynamic economic sector Any companies or consultants looking for new markets must read The Restoration Economy Pamela J Gordon CMC President Technology Forecasters Inc The Restoration Economy is required reading here at Weston Solutions It has been indispensable in helping us refocus our strategy Bill Robertson Chairman Weston Solutions The Restoration Economy is without a doubt the most important and valuable business book I have read in many years Don Pross Urban Revitalization Planner This book is an original a first I profited from it greatly and I quote from it in my speeches William H Hudnut III Former Four Term Mayor of Indianapolis

**Time and Tide in Acadia** Christopher Camuto,2010-05-25 An evocative exploration of the natural life of Maine s Mount Desert Island and Acadia National Park Mount Desert Island and Acadia National Park have been described as the climax of the coast of Maine Millions are drawn every year to the stunning beauty of this rocky landscape of spruce fir forest and granite islands Some like nature writer Christopher Camuto never stop coming back In Time and Tide in Acadia the author draws on years of walking Mount Desert s summits and shorelines canoeing its marshes kayaking its tidal waters and visiting its outer islands To this task Camuto brings an appetite for observing wildlife and landscape with considerable originality a regard for history and indigenous perceptions of nature a keen interest in exploring the psychological and philosophical appeal of nature and a writer s love of language As in his previous highly praised books Camuto fulfills his promise to give the reader innumerable vantages on the nature of a remarkable place that it takes time to get to know

**Entanglements** Tora Johnson,2007-09-23 Entanglements explores the clash of cultures and personalities among

fishermen scientists and whale advocates struggling to save both the endangered North Atlantic right whale and the livelihoods of thousands of Atlantic coastal families By most counts about 300 of these whales remain in the North Atlantic and scientists warn that collisions with fishing gear are contributing to their decline The political climate that surrounds the world's most endangered large whale is contentious complex and heartrending Without pointing fingers or laying blame Tora Johnson explores every side of the issue She takes us to sea with fishermen who struggle to stay in business setting traps and gillnets in the whale's habitat and with members of the rescue teams who attempt to cut away deadly rope and net from whales in the wild Weaving their stories and her personal observations into a discussion of the science and history of the conflict she offers an admirable balance of perceptions backgrounds and agendas Her thoughtful discussion of the plight of fishermen and whales and of the frustrations between fishing communities and conservationists presents an authentic microcosm of the global conflict between human demands on the environment and nature's finite capacity for supporting those demands

*Animals and Society* Margo DeMello, 2012 This textbook provides a full overview of human animal studies It focuses on the conceptual construction of animals in American culture and the way in which it reinforces and perpetuates hierarchical human relationships rooted in racism sexism and class privilege

**Teaching the Animal: The Social Sciences**, *Teaching the Animal*, *The Institutional Dimensions of Environmental Change* Oran R. Young, 2002 A study that lays the foundation for cumulative research on the roles institutions play in causing and confronting environmental changes

**Human-Animal Studies** Margo DeMello, 2012-04 An exhaustive listing of books journals articles films conferences college programs organizations and websites from the new and exciting discipline of Human Animal studies The information was gathered by leading academics in the humanities the social sciences and the natural sciences this is the only reference of its kind This project was completed in conjunction with the book *Teaching the Animal*

**American Environmental History** Carolyn Merchant, 2007-10-31 By studying the many ways diverse peoples have changed shaped and conserved the natural world over time environmental historians provide insight into humanity's unique relationship with nature and more importantly are better able to understand the origins of our current environmental crisis Beginning with the precolonial land use practice of Native Americans and concluding with our twenty first century concerns over our global ecological crisis *American Environmental History* addresses contentious issues such as the preservation of the wilderness the expulsion of native peoples from national parks and population growth and considers the formative forces of gender race and class Entries address a range of topics from the impact of rice cultivation slavery and the growth of the automobile suburb to the effects of the Russian sea otter trade Columbia River salmon fisheries the environmental justice movement and globalization This illustrated reference is an essential companion for students interested in the ongoing transformation of the American landscape and the conflicts over its resources and conservation It makes rich use of the tools and resources climatic and geological data court records archaeological digs and the writings of naturalists that environmental historians

rely on to conduct their research The volume also includes a compendium of significant people concepts events agencies and legislation and an extensive bibliography of critical films books and Web sites
