Belt, 1988 The New Grove Musical Instruments Series a companion to the much acclaimed New Grove Composer Biography Series presents in book form many of the lengthy and informative articles published in The New Grove Dictionary of Musical Instruments Piano Pedagogy Gilles Comeau, 2009 No further information has been provided for this title The Composer-pianists Robert Rimm, 2002 The recordings made by Marc Andre Hamelin in recent years have cast new light on an extraordinary group of composers Alkan Busoni Feinberg Godowsky Medtner Rachmaninov Scriabin and Sorabji whose works heralded a Golden Age of virtuosic writing for the piano The Eight as author Robert Rimm has termed these composer pianists have much in common traits shared in our own age with Marc Andre Hamelin their foremost interpreter For all their evident differences of age nationality and philosophy they each created music of unprecedented ingenuity often complex and of immense scale that stretched the limits of the piano's capabilities And all were genuine virtuosos with the technical resources to play these demanding works in public The volume includes rare photographs and concludes with an extensive bibliography listings of the complete solo piano works of The Eight and discographies of their solo piano recordings In exploring the art of those who knew their instrument both as composers and as pianists this book serves in the words of pianist Stephen Hough both as a fascinating exhaustive study of the riches of the past and as a stimulating inspiration for the future BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *Practicing Perfection* Roger Chaffin, Gabriela Imreh, Mary Crawford, 2005-04-11 The memory feats of famous musicians seem almost superhuman Can such extraordinary accomplishments be explained by the same principles that account for more ordinary everyday memory abilities To find out a concert pianist videotaped her practice as she learned a new piece for performance the third movement Presto of the Italian Concerto by J S Bach The story of how the pianist went about learning memorizing and polishing the piece is told from the viewpoints of the pianist the second author and of a cognitive psychologist the first author observing the practice The counterpoint between these insider and outsider perspectives is framed by the observations of a social psychologist the third author about how the two viewpoints were reconciled The CD that accompanies the book provides for yet another perspective allowing the reader to hear the polished performance Written for both psychologists and musicians the book provides the first detailed description of how an experienced pianist organizes her practice identifying stages of the learning process characteristics of expert practice and practice strategies The main focus however is on memorization An analysis of what prominent pianists of the past century have said about memorization reveals

considerable disagreement and confusion Using previous work on expert memory as a starting point the authors show how principles of memory developed by cognitive psychologists apply to musical performance and uncover the intimate connection between memorization and interpretation
