Medhurst, 2020-08-26 This volume traces the historical evolution of American academic thought concerning public address what it is how it ought to be studied and what can be learned by engaging rhetorical texts in an analytical fashion To begin one must distinguish among three separate but interrelated uses of the term public address as practice theory and criticism The essays in this volume represent landmarks in the literal sense of that term they are marks on the intellectual landscape that indicate where scholars and ideas have passed and in that passing left a mark for future generations It is appropriate to revisit the landmarks that have set public address off as a field of study and it allows readers to remember the struggles that have led to the current situation Most of the authors of the following chapters are deceased but their ideas live on transformed adapted modified rejected and reborn The scholarly dialectic continues What constitutes a study in public address how best to approach rhetorical texts which analytical tools are required for the job how best to balance text with context and what role ought theory to play in the conduct or outcome of critical inquiry these questions live on To answer them at all is to engender debate and that is how it should be if the intellectual vitality of public address is to be maintained The papers are a prolegomenon to such studies for they mark where scholars have been and point the way to

Analysing Political Speeches Jonathan Charteris-Black, 2018-08-24 Exploring speeches by public figures such as Emma Watson, Tony Blair, Donald Trump, Julia Gillard, and Lady Gaga, this engaging textbook explains the ways in which political speeches can be analysed. It examines the role of language in speeches and how it can be used to challenge or reinforce prevailing social, cultural, and political attitudes. Each chapter introduces a particular discourse approach and then applies this in a model analysis of a passage of text. The chosen texts concern issues of social, cultural, and political importance that address topics of significant importance to the audience to which they were delivered. Students are encouraged to engage with the text and consider how approaches to text analysis such as cohesion, context analysis, and metaphor analysis may be adapted to provide a more critical perspective. This text will be essential reading for students of English language, linguistics, communication studies, and politics on critical discourse and discourse analysis modules.

Classical Rhetorical Argumentation for the Rhetorical Critic Mika Hietanen, 2025-07-08 This book offers a reassessment of argumentation in classical rhetoric, foregrounding its rational dimension. Moving beyond introductions, it provides insights from Aristotle, Quintilian, and other ancient thinkers while addressing common misconceptions and offering clarifications that are particularly valuable for the rhetorical critic. Adopting a Scandinavian rhetorical perspective, this book argues that classical rhetoric offers enduring tools for both the analysis and the construction of persuasive argumentation. By bridging theory and practice, it demonstrates how classical rhetoric remains highly relevant while also naturally integrating with analyses that focus on classical concepts such as ethos, pathos, or style, whether through neo-Aristotelian methods or contemporary approaches rooted in the classical rhetorical tradition. Key concepts are explored in dedicated chapters: the art of logos-based argumentation is reassessed, enthymeme and epicheireme structures are examined, and *topoi* and *staseis* are discussed in relation to their later developments. A chapter on the centenary of rhetorical criticism traces its evolution from Herbert Wichelns (1925) to today, proposing a new template for the rhetorical critic. This concise yet comprehensive book will interest intermediate and advanced students as well as scholars of rhetoric, argumentation, persuasion, speech, and writing studies, and communication studies.
