**Beyond Black and White** Manning Marable, 2016-11-15. Many in the US including Barack Obama have called for a post-racial politics yet race still divides the country politically, economically and socially. In this highly acclaimed work Manning Marable rejects both liberal inclusionist strategies and the separatist politics of the likes of Louis Farrakhan. Beginning by looking back at African American politics and the fight against racism of the recent past, outlining a trenchant analysis of the New Racial Domain that must be uprooted, he argues powerfully for a transformationist strategy which retains a distinctive black cultural identity but draws together all the poor and exploited in a united struggle against oppression.

My Los Angeles in Black and (Almost) White Andrew Furman, 2010-12-07. Growing up in Los Angeles in the 1980s, roughly half of Furman's high school basketball teammates lived in the largely Anglo and increasingly Jewish San Fernando Valley while the other half were African Americans bused in from the inner city. Los Angeles was embroiled in efforts to desegregate its public school district, one of the largest and most segregated in the country. Tensions came to a head in the late 1970s as the state implemented its forced busing plan, a radical desegregation program that was hotly contested among Los Angeles residents, particularly among Valley residents, and at all levels of the courts, including the U.S. Supreme Court. In *My Los Angeles in Black and Almost White*, the high school's diverse basketball team serves as the entry point for a trenchant exploration of the judicial, legislative and neighborhood battles over school desegregation that gripped the city in the aftermath of *Brown v. Board of Education* and that continue to plague our post-racial nation. Furman accesses a diverse array of opinions about these years and about the current crisis of race and public education by examining landmark judicial decisions, public policy studies and newspaper articles, and by interviewing key community leaders, including former U.S. Representative Bobbi Fiedler, the Jewish activist who led the campaign to stop forced busing in Los Angeles, and retired Superior Court Judge Paul Egly, with whom Fiedler and her allies wrangled. Furman also documents his recent visit to Los Angeles during which he met with several of his former teammates, coaches and neighbors. At once critical and fair-minded, *My Los Angeles in Black and Almost White* cuts through the incendiary rhetoric over school desegregation to offer a lucid, engaging and informed account of our long legacy and current challenges regarding race and public education.

*Public Papers of the Presidents of the United States*, United States. President, 2000. Containing the public messages, speeches and statements of the President, 1956-1992.

**Racing Cyberculture** Christopher L. McGahan, 2013-10-31. *Racing Cyberculture* explores new media art that challenges the race-blind myth of cyberspace. The particular cultural workers whose productions are addressed are the performance and installation artist Guillermo Gomez-Pena and Roberto Sifuentes, the UK new media arts collective Mongrel, the conceptual artists and composer Keith Obadike, and the multimedia artist Prema Murthy. The author looks at how works by these artists bring forward questions of racial and

cultural identity as they intersect with information technology      **Weekly Compilation of Presidential Documents** ,2000

Fretz,2015-12-24 Climate Change across the Curriculum examines ways of thinking and conveying information about climate change across university curricula and within academic disciplines The contributors provide methods strategies rationales and theoretical justifications for teaching climate issues at the university level The content of this book aims to introduce climate change to classes outside of the sciences as it will take a wide range of disciplines broader institutional thinking and experimentation to fully engage university resources and knowledge toward the mitigation of fossil fuel consumption and adaptation to the negative consequences of climate change Climate Change across the Curriculum encourages professors to engage salient aspects of their academic disciplines to the study of climate issues in the classroom as well as sample theories practices and resources from a wide range of academic disciplines outside of their own areas of specialization The contributors ask what role will higher education play in addressing environmental challenges and producing students who become professionals who accomplish work that solves these problems      *The New Roberts Court, Donald Trump, and Our Failing Constitution* Stephen M. Feldman,2017-07-04

This book traces the evolution of the constitutional order explaining Donald Trump s election as a symptom of a degraded democratic capitalist system Beginning with the framers vision of a balanced system balanced between the public and private spheres between government power and individual rights the constitutional order evolved over two centuries until it reached its present stage Democracy Inc in which corporations and billionaires wield herculean political power The five conservative justices of the early Roberts Court including the late Antonin Scalia stamped Democracy Inc with a constitutional imprimatur contravening the framers vision while simultaneously claiming to follow the Constitution s original meaning The justices believed they were upholding the American way of life but they instead placed our democratic capitalist system in its gravest danger since World War II With Neil Gorsuch replacing Scalia the new Court must choose Will it follow the early Roberts Court in approving and bolstering Democracy Inc or will it restore the crucial balance between the public and private spheres in our constitutional system      *The Great Power (mis)management* Alexander Astrov,2011 Drawing on the empirical case of the Russian Georgian war of 2008 this book explores the theoretical underpinnings of the idea of great power

management first articulated within the English School of International Relations The contributors to the volume approach this idea from a variety of theoretical perspectives ranging from policy analysis to critical theory      *The Collected Works of H.
