Great White Shark The Definitive Look At The Most Terrifying Creature Of The Ocean:

Great White Shark Richard Ellis, John E. McCosker, 1991 Shares the latest findings on the great white shark's size, ancestry, relatives, breeding, and feeding habits *Great White* James Woodford, 2014-12-01 I remember thinking two things at the time. Firstly, if it had wanted to eat us, we wouldn't have stood a chance, and second, it didn't want to eat us. When James Woodford was confronted by half a dozen sharks swimming at full speed, he froze in shock. But he was even more surprised when they swam right past, completely ignoring him. He couldn't reconcile this experience with the mindless eating machines that dominate the discussion of sharks in Australia. Interviewing world-renowned experts and joining research teams at Neptune Islands, one of the most famous shark aggregation locations in the world and consequently one of the most dangerous dive sites, James investigates these intriguing creatures at close range and discovers their fascinating world.

The Real Jaws Rachel Lee Perez, 2025-08-30 Explores the 1916 New Jersey shark attacks, their impact on shark fear, and how media shaped harmful misconceptions. In the Summer of 1916, a series of shark attacks along the New Jersey shore would send shockwaves across its otherwise peaceful beach towns. Spanning a terrifying two weeks, including the deaths of nearly five people, these attacks would officially cement an innate fear of sharks that humans have felt since the beginning of time. Although initially kept under wraps by the tourism industry, these attacks would ultimately plaster the front pages of newspapers across the United States and even overseas. As the news spread, the line between fact and fiction blurred, reshaping our cultural and scientific understanding of the beasts of the ocean. It was the 1916 shark attacks that would establish our modern-day misconstrued perception of sharks as evil man-eating monsters and would later inspire the film *Jaws*, which would perpetuate the same harmful narrative. *The Real Jaws* takes an in-depth look at each one of the attacks and how they instilled a centuries-long fear of the ocean's apex predator. It explores the various theories explaining why these attacks may have occurred and the probability of something like this happening again. And finally, it analyses the way the harmful misconceptions derived from films like *Jaws* have redefined humanity's relationship with sharks, leading humans to become the predators and sharks to become the prey. **The Private Life of Sharks** Michael Bright, 2000 Explores the world of one of the most fascinating, frightening creatures on the planet, offering a compelling look at the shark's often misunderstood life in the wild.

Close to Shore Michael Capuzzo, 2002-05-21 Combining rich historical detail and a harrowing, pulse-pounding narrative, *Close to Shore* brilliantly re-creates the summer of 1916 when a rogue Great White shark attacked swimmers along the New Jersey shore, triggering mass hysteria and launching the most extensive shark hunt in history. In July 1916, a lone Great White left its usual deep-ocean habitat and headed in the direction of the New Jersey shoreline. There, near the towns of Beach Haven and Spring Lake, and incredibly, a farming community eleven miles inland, the most ferocious and unpredictable of predators began a deadly rampage. The first shark attacks on swimmers in U.S. history. Capuzzo interweaves a vivid portrait of the era and meticulously drawn characters with chilling accounts of the shark's five

attacks and the frenzied hunt that ensued From the unnerving inevitability of the first attack on the esteemed son of a prosperous Philadelphia physician to the spine tingling moment when a farm boy swimming in Matawan Creek feels the sandpaper like skin of the passing shark Close to Shore is an undeniably gripping saga Heightening the drama are stories of the resulting panic in the citizenry press and politicians and of colorful personalities such as Herman Oelrichs a flamboyant millionaire who made a bet that a shark was no match for a man and set out to prove it Museum of Natural History ichthyologist John Treadwell Nichols faced with the challenge of stopping a mythic sea creature about which little was known and most memorable the rogue Great White itself moving through a world that couldn't conceive of either its destructive power or its moral right to destroy Scrupulously researched and superbly written Close to Shore brings to life a breathtaking pivotal moment in American history Masterfully written and suffused with fascinating period detail and insights into the science and behavior of sharks Close to Shore recounts a breathtaking pivotal moment in American history with startling immediacy

Sharks in the Shallows W. Clay Creswell, 2021-06-14 A detailed account of over one hundred shark related incidents on the coast of the Carolinas from a shark bite investigator Powerful and mysterious sharks inspire both fascination and fear Worldwide oceans are home to some five hundred species and of those fifty six are known to reside in or pass through the waters off the coast of both North and South Carolina At any given time waders swimmers and surfers enjoying these waters are frequently within just one hundred feet of a shark While it's unnerving to know that sharks often swim just below the surface in the shallows W Clay Creswell a shark bite investigator for the Shark Research Institute's Global Shark Attack File explains that attacks on humans are extremely rare In 2019 the International Shark Attack File confirmed sixty four unprovoked attacks on humans including three in North Carolina and one in South Carolina While acknowledging that they pose real dangers to humans Creswell believes the fear of sharks is greatly exaggerated During his sixteen year association with the Shark Research Institute he has investigated more than one hundred shark related incidents and has maintained a database of all shark human encounters along the Carolina coastlines back to 1817 Creswell uses this data to expose the truth and history of this often sensationalized topic Beyond the statistics related to attacks in the Carolina waters Sharks in the Shallows offers a history of shark human interactions and an introduction to the world of shark attacks Creswell details the conditions that increase a person's chances of an encounter profiles the three species most often involved in attacks and reveals the months and time of day with the highest probability of an encounter With a better understanding of sharks responses to their environment and what motivates them to attack humans he hopes people will develop a greater appreciation of the invaluable role sharks play in our marine environment
