Janes, 2016-02-25 In the wake of the First World War in which France suffered severe food shortages colonial produce became an increasingly important element of the French diet The colonial lobby seized upon these foodstuffs as powerful symbols of the importance of the colonial project to the life of the French nation But how was colonial food really received by the French public And what does this tell us about the place of empire in French society In *Colonial Food in Interwar Paris* Lauren Janes disputes the claim that empire was central to French history and identity arguing that the distrust of colonial

Wiskerke, 2020-08-13 This handbook includes contributions from established and emerging scholars from around the world and draws on multiple approaches and subjects to explore the socio economic cultural ecological institutional legal and policy aspects of regenerative food practices The future of food is uncertain We are facing an overwhelming number of interconnected and complex challenges related to the ways we grow distribute access eat and dispose of food Yet there are stories of hope and opportunities for radical change towards food systems that enhance the ability of living things to co evolve Given this activities and imaginaries looking to improve rather than just sustain communities and ecosystems are needed as are fresh perspectives and new terminology The Routledge Handbook of

Sustainable and Regenerative Food Systems addresses this need. The chapters cover diverse practices, geographies, scales, and entry points. They focus not only on the core requirements to deliver sustainable agriculture and food supply but go beyond this to think about how these can also actively participate with social ecological systems. The book is presented in an accessible way with reflection questions meant to spark discussion and debate on how to transition to safe, just, and healthy food systems. Taken together, the chapters in this handbook highlight the consequences of current food practices and showcase the multiple ways that people are doing food differently. **Eating the Enlightenment** E.C. Spary, 2013-04-08. Eating the Enlightenment offers a new perspective on the history of food, looking at writings about cuisine, diet, and food chemistry as a key to larger debates over the state of the nation in Old Regime France. Embracing a wide range of authors and scientific or medical practitioners, from physicians and poets to philosophes and playwrights, E.C. Spary demonstrates how public discussions of eating and drinking were used to articulate concerns about the state of civilization versus that of nature, about the effects of consumption upon the identities of individuals and nations, and about the proper form and practice of scholarship. En route, Spary devotes extensive attention to the manufacture, trade, and eating of foods, focusing upon coffee and liqueurs in particular, and also considers controversies over specific issues such as the chemistry of digestion and the nature of alcohol. Familiar figures such as Fontenelle, Diderot, and Rousseau appear alongside little-known individuals from the margins of the world of letters, the draughtsman playing café owner Charles Manoury, the Turkish envoy Soliman Aga, and the natural philosopher Jacques Gautier d'Agoty. Equally entertaining and enlightening, Eating the Enlightenment will be an original contribution to discussions of the dissemination of knowledge and the nature of scientific authority.

**Forthcoming Books** Rose Arny, 2002-02. *Royal Taste* Daniëlle De Vooght, 2016-04-08. The explicit association between food and status was, academically speaking, first acknowledged on the food production level. He who owned the land possessed the grain; he who owned the mill had the flour; he who owned the oven sold the bread. However, this conceptualization of power is dual. Next to the obvious demonstration of power on the production level is the social significance of food consumption. Consumption of rich food in terms of quantity

and quality was and is a means to show one's social status and to create or uphold power This book is concerned with the relationship between food consumption status and power Contributors address the old top of society and consider the way kings and queens emperors and dukes nobles and aristocrats wine and dine in the rapidly changing world of the late eighteenth and nineteenth centuries where the bourgeoisie and even the common people obtained political rights economic influence social importance and cultural authority The book questions the role of food consumption at courts and the significance of particular foodstuffs or ways of cooking deals with the number of guests and their place at the table and studies the way the courts under consideration influenced one another Topics include the role of sherry at the court of Queen Victoria as a means of representing middle class values the use of the truffle as a promotional gift at the Savoy court and the influence of European culture on banqueting at the Ottoman Palace Together the volume addresses issues of social networks prestige politics and diplomacy banquets and their design income and spending economic aims taste and preference cultural innovations social hierarchies material culture and many more social and cultural issues It will provide a useful entry into food history for scholars of court culture and anyone with an interest in modern cultural history *Time Out Paris* Editors of
