## Victorian Inventors

Read the history facts below, then draw three great 19th century inventions whose creators continued to affect our lives today.

Name: Margaret I. Knight

Read Famous Inventions: Paper Bags

Margaret I. Knight was born in Rhode Island on 27th February 1806 to her father, James Knight, and her mother, Hannah. Not fully, her father passed away when she was young. This meant that Margaret learned only to knit stockings and went to work in a cotton mill when she was only a child.

At 15, Margaret attended an academy at the mill. She decided to invent a sewing device for the mill workers, which is thought to have inspired a sewing machine.

In 1831, Margaret was employed by the Industrial Paper Bag Company. In 1844, she invented a machine that folded and glued paper to form flat-bottomed paper bags. Her father knew what her design for Margaret had been to invent and gave the right to sell the design for free.

Margaret continued creating useful objects, including a number of designs for the rest of her life.

### Did You Know...?

During the Victorian era, women were seen as less intelligent than men. They were told not to know that Margaret was capable of creating useful things.

Name: George Washington Carter

Read Famous Inventions: Patent rights

George Washington Carter was a Black teacher, inventor and inventor. He became known as 'The patent man' due to his machines that used patents to create many useful objects and inventions.

George was born into slavery in the early 1830s to an enslaved woman owned by Thomas Carter. In 1855, slavery ended but Thomas and his wife, Susan, decided to continue to look after and educate George and his brother in their home. George was educated in science.
