Great Maya Droughts:

The Great Maya Droughts Richardson B. Gill, 2001-04-01 This innovative study argues that the collapse of Classic Maya civilization was driven by catastrophic drought Between A D 800 and 1000 unrelenting drought killed millions of Maya people with famine and thirst and initiated a cascade of internal collapses that destroyed their civilization Linking global regional and local climate change the author explores how atmospheric processes volcanism ocean currents and other natural forces combined to create the dry climate that pried apart the highly complex civilization in the tropical Maya Lowlands in the ninth and tenth centuries Drawing on knowledge of other prehistoric and historic droughts *The Great Maya Droughts* is a useful study of the relationship of humans to their natural and physical environment The author tries to understand why the Classic Maya failed to adjust their behavior and culture to the climatic conditions and why civilizations in general sometimes collapse in the face of radical environmental change

The Great Maya Droughts in Cultural Context Gyles Iannone, 2014-03-15 In *The Great Maya Droughts in Cultural Context* contributors reject the popularized link between societal collapse and drought in Maya civilization arguing that a series of periodic collapses including the infamous Terminal Classic collapse AD 750 1050 were not caused solely by climate change related droughts but by a combination of other social political and environmental factors New and senior scholars of archaeology and environmental science explore the timing and intensity of droughts and provide a nuanced understanding of socio ecological dynamics with specific reference to what makes communities resilient or vulnerable when faced with environmental change Contributors recognize the existence of four droughts that correlate with periods of demographic and political decline and identify a variety of concurrent political and social issues They argue that these primary underlying factors were exacerbated by drought conditions and ultimately led to societal transitions that were by no means uniform across various sites and subregions They also deconstruct the concept of collapse itself although the line of Maya kings ended with the Terminal Classic collapse the Maya people and their civilization survived *The Great Maya Droughts in Cultural Context* offers new insights into the complicated series of events that impacted the decline of Maya civilization This significant contribution to our increasingly comprehensive understanding of ancient Maya culture will be of interest to students and scholars of archaeology anthropology geography and environmental studies

The Great Maya Droughts in Cultural Context Gyles Iannone, 2005 In *The Great Maya Droughts in Cultural Context* contributors reject the popularized link between societal collapse and drought in Maya civilization arguing that a series of periodic collapses including the infamous Terminal Classic collapse AD 750 were caused not solely by climate change related droughts but by a combination of other social political and environmental factors New and senior scholars of archaeology and environmental science explore the timing and intensity of droughts and provide a nuanced understanding of socio ecological dynamics with specific reference to what makes communities resilient or vulnerable when faced with environmental change Contributors recognize the existence of four droughts that correlate with periods of demographic and political decline and

identify a variety of concurrent political and social issues They argue that these primary underlying factors were exacerbated by drought conditions and ultimately led to societal transitions that were by no means uniform across various sites and subregions They also deconstruct the concept of collapse itself although the line of Maya kings ended with the Terminal Classic collapse the Maya people and their civilization survived

Encyclopedia of Paleoclimatology and Ancient Environments Vivien Gornitz,2008-10-31 One of Springer s Major Reference Works this book gives the reader a truly global perspective It is the first major reference work in its field Paleoclimate topics covered in the encyclopedia give the reader the capability to place the observations of recent global warming in the context of longer term natural climate fluctuations Significant elements of the encyclopedia include recent developments in paleoclimate modeling paleo ocean circulation as well as the influence of geological processes and biological feedbacks on global climate change The encyclopedia gives the reader an entry point into the literature on these and many other groundbreaking topics

Water and Society from Ancient Times to the Present Federica Sulas,Innocent Pikirayi,2018-08-14 As water availability management and conservation become global challenges there is now wide consensus that historical knowledge can provide crucial information to address present crises offering unique opportunities to appreciate the solutions and mechanisms societies have developed over time to deal with water in all its forms from rainfall to groundwater This unique collection explores how ancient water systems relate to present ideas of resilience and sustainability and can inform future strategy Through an investigation of historic water management systems along with the responses to and impact of various water driven catastrophes contributors to this volume present tenable solutions for the long term use of water resources in different parts of the world The discussion is not limited to issues of the past seeking instead to address the resonance and legacy of water histories in the present and future Water and Society from Ancient Times to the Present speaks to an archaeological and non archaeological scholarly audience and will be a useful primary reference text for researchers and graduate students from a variety of disciplinary backgrounds including archaeology anthropology history ecology geography geology architecture and development studies

Humans Versus Nature Daniel R. Headrick,2020 Since the appearance of Homo sapiens on the planet hundreds of thousands of years ago human beings have sought to exploit their environments extracting as many resources as their technological ingenuity has allowed As technologies have advanced in recent centuries that impulse has remained largely unchecked exponentially accelerating the human impact on the environment Humans versus Nature tells a history of the global environment from the Stone Age to the present emphasizing the adversarial relationship between the human and natural worlds Nature is cast as an active protagonist rather than a mere backdrop or victim of human malfeasance Daniel R Headrick shows how environmental changes epidemics climate shocks and volcanic

eruptions have molded human societies and cultures sometimes overwhelming them At the same time he traces the history of anthropogenic changes in the environment species extinctions global warming deforestation and resource depletion back to the age of hunters and gatherers and the first farmers and herders He shows how human interventions such as irrigation systems over fishing and the Industrial Revolution have in turn harmed the very societies that initiated them Throughout Headrick examines how human driven environmental changes are interwoven with larger global systems dramatically reshaping the complex relationship between people and the natural world In doing so he roots the current environmental crisis in the deep past

The Maya Forest Garden Anabel Ford,Ronald Nigh,2016-07 Using studies on contemporary Maya farming techniques and important new archaeological research the authors show that the ancient Maya were able to support sustainably a vast population by farming the forest thus refuting the common notion that Maya civilization devolved due to overpopulation and famine

The Climate Connection Renée Hetherington,Robert G. B. Reid,2010-03-11 Highlights the influence of saltatory evolution and rapid climate change on human evolution migration and behavioural change Growing concern over the potential impacts of climate change on our future is clearly evident In order to better understand our present circumstances and deal effectively with future climate change society needs to become more informed about the historical connection between climate and humans The authors combined research in the fields of climate change evolutionary biology Earth sciences and human migration and behaviour complement each other and have facilitated an innovative and integrated approach to the human evolution climate connection The Climate Connection provides an in depth text linking 135 000 years of climate change with human evolution and implications for our future for those working and interested in the field and those embarking on upper level courses on this topic

Approaches to Monumental Landscapes of the Ancient Maya Brett A. Houk,Barbara Arroyo,Terry G. Powis,2019-12-11 This volume brings together a wide spectrum of new approaches to ancient Maya studies in an innovative exploration of how the Preclassic and Classic Maya shaped their world Moving beyond the towering temples and palaces typically associated with the Maya civilization contributors present unconventional examples of monumental Maya landscapes Featuring studies from across the central Maya lowlands Belize and the northern and central Maya highlands and spanning over 10 000 years of human occupation in the region these chapters show how the word monumental can be used to describe natural and constructed landscapes political and economic landscapes and ritual and sacred landscapes Examples include a massive system of aqueducts and canals at the Kaminaljuyu site a vast arena designed for public spectacle at Chan Chich and even the complex realms of Maya cosmology as represented by the ritual cave at Las Cuevas By including physical conceptual and symbolic ways monumentality pervaded ancient Maya culture this volume broadens traditional understandings of how the Maya interacted with their environment and provides exciting analytical perspectives to guide future study A volume in the series Maya Studies edited by Diane Z Chase and Arlen F Chase

Climate Change and the Course of Global History John L.

Brooke,2014-03-17 The first global study by a historian to fully integrate the earth system approach of the new climate science with the material history of humanity **Encyclopedia of the Ancient Maya** Walter R. T. Witschey,2015-12-24
Encyclopedia of the Ancient Maya offers an A to Z overview of the ancient Maya culture from its inception around 3000 BC to the Spanish Conquest after AD 1600 Over two hundred entries written by more than sixty researchers explore subjects ranging from food clothing and shelter to the sophisticated calendar and now deciphered Maya writing system They bring special attention to environmental concerns and climate variation fresh understandings of shifting power dynamics and dynasties and the revelations from emerging field techniques such as LiDAR remote sensing and newly explored sites such as La Corona Tamchen and Yaxnohkah This one volume reference is an essential companion for students studying ancient civilizations as well as a perfect resource for those planning to visit the Maya area Cross referencing topical and alphabetical lists of entries and a comprehensive index help readers find relevant details Suggestions for further reading conclude each entry while sidebars profile historical figures who have shaped Maya research Maps highlight terrain archaeological sites language distribution and more over fifty photographs complement the volume From Pen to Pixel Patrizia Fortini,Krupali Krusche,2021-01-31 Efforts to build rebuild and maintain the Forum Romanum Rome s historic urban epicenter are likely as old as the place it self some 2800 years As a result the historic significance and archaeological richness of the Forum cannot be overestimated Despite its many changes the Forum Romanum s survival today represents an outstanding example of cultural heritage continuity Its highest possible protection status among monuments conservation agencies in Italy and its early listing on UNESCO s World Heritage List in 1980 are testaments to this Due to its remarkable physical survival the Forum Romanum has been the object of extensive research documentation restoration and preservation efforts over the past two centuries especially The sophistication of these measures evolved to include a wide range of expertise Lay interest among antiquarians and architects in Rome s past from the Renaissance through the eighteenth century was supplanted by the emerging new disciplines of archaeology architectural restoration and museology From the late nineteenth century corresponding advancements in archaeological method and conservation theory and science were increasingly applied From this time on as well expectations for preserving and presenting the Forum Romanum were high the famous site being a matter of intense Roman pride political interest and serving as a must see destination for visitors to Rome Leading historians archaeologists and conservators have been central to the story of the Forum s survival and interpretation While numerous noted antiquarians and historians preceded him the architect and archaeologist Giacomo Boni 1859 1925 was unusual even prescient in his approach and treatment of the place during his tenure as director of excavations of the Forum Romanum from 1898 until 1925 His combined talents as an architect archaeologist and conservator set a standard at the time for careful research thorough documentation and responsible conservation measures The sponsors of the DHARMA conference have wisely chosen to focus on archaeological research and conservation in the Forum during Giacomo Boni s tenure since

his work reflects early best practices in researching preserving and interpreting such places To frame the discussion some precedents and influences of the work of Giacomo Boni are offered

The Regenerative Agriculture Solution Andre Leu,Ronnie Cummins,2024-09-26 Read this book to understand why you should care about regenerative agriculture Until the public is better informed and insists on sweeping changes to current agricultural policy we will continue to degrade our planet and destabilize our climate Leu and Cummins through inspiring stories and solid science show just how quickly we could turn that around Allan Savory president Savory Institute chairman Africa Centre for Holistic Management Is it possible that the solution to the global climate emergency lies in a waste agricultural product The best kept secret in today s world is that solutions to some of our most pressing issues food insecurity deforestation overgrazing water scarcity rural poverty forced migration lie in adopting improving and scaling up organic and regenerative agriculture best practices The Regenerative Agriculture Solution starts with the story of how two brothers Jose and Gilberto Flores are at the leading edge of this approach pioneering the use of the previously discarded leaves of the prodigious agave plant to regenerate agricultural soils reduce erosion and improve water capture When Ronnie Cummins the cofounder of Organic Consumer Association OCA and Regeneration International met the Flores brothers in 2019 and witnessed their revolutionary agave agroforestry system he knew they were onto something important Cummins had spent decades studying the potential and pitfalls of organic and regenerative agriculture and knew best practices when he saw them He started to write a book about Flores s brother and other visionary people such as Dr Vandana Shiva Allan Savory and John Liu who started landscape scale regeneration projects The scientific data was even more convincing suggesting that these projects and others like it could revolutionize how we understand the climate catastrophe Sadly Cummins passed away in April 2023 in the midst of working on the book Not to leave this work unfinished Ronnie s widow and OCA cofounder Rose called on their friend colleague and collaborator Regeneration International s cofounder Andr Leu to complete the work and place the Flores brothers breakthroughs in the broader context of regenerative agriculture solutions to the world s many interlocking ecological crises The result isThe Regenerative Agriculture Solution a book that shows how regenerating our forests rangelands and farming ecosystems can cool our planet restore the climate and enrich our communities
