The background of the page is a landscape painting. It depicts a wide river valley. In the foreground, a river flows from the right towards the center, its surface reflecting the sky. The banks are covered in dense, dark green vegetation. In the middle ground, a range of mountains stretches across the horizon, their peaks partially shrouded in mist or low clouds. The sky is a pale, hazy blue, suggesting a soft, overcast day. The overall style is that of a traditional landscape painting, with visible brushstrokes and a rich, somewhat muted color palette.

**Economic Valuation of River Systems** Fredrick J. Hitzhusen, 2007. The book provides a wide variety of practical examples of economic assessments of river management projects. The book offers policy makers a nice range of valuation case studies and practical and illustrative guidance on the use of economic valuation results in cost benefit analysis of river management.

Marije Schaafsma, *Environmental and Resource Economics*. It is rare to find a book that attempts to integrate physical biological and social sciences economics to address environmental problems but this book does a great job of it. It is also rare to find a book that addresses both the benefits and the costs of river restoration and again this book delivers. This collection of case studies provides an informative and practical guide to conducting economic analyses of many different types of river restoration. Scientists interested in quantifying the benefits and costs of river restoration will gain a very quick and thorough education from the case studies presented in this book.

John Loomis, Colorado State University, US. The book applies benefit cost analysis and a wide array of non market and distribution economic valuation methods in ecologic context to determine the pay off and distribution impacts of various infrastructure and water quality improvements to eight river systems in the Great Lakes region of the US. The generally positive results have important implications for public policy and future research. Prime readership is the wide range of academics, NGO and government agency staff and citizen action groups concerned with the management and protection of rivers and other natural resource systems.

**Liverpool to Great Salt Lake** LaJean Purcell Carruth, Ronald G. Watt, 2022-05. George Darling Watt was the first convert of the Church of Jesus Christ of Latter day Saints baptized in the British Isles. He emigrated to Nauvoo Illinois in 1842. He returned to the British Isles in 1846 as a missionary accompanied by his wife and young son. He remained there until 1851 when he led a group of emigrant converts to Salt Lake City Utah. Watt recorded his journey from Liverpool to Chimney Rock in Pitman shorthand. Remarkably his journal wasn't discovered until 2001 and is transcribed and appearing for the first time in this book. Watt's journal provides an important glimpse into the transatlantic nature of Latter day Saint migration to Salt Lake City. In 1850 there were more Latter day Saints in England than in the United States but by 1890 more than eighty five thousand converts had crossed the Atlantic and made their way to Salt Lake City. Watt's 1851 journal opens a window into those overseas riverine and overland journeys. His spirited accounts provide wide ranging details about the births, marriages, deaths, Sunday sermons, interpersonal relations, weather and food and water shortages of the journey as well as the many logistical complexities.
