into perspective and a suitable historical and philosophical connection given a work before it can be so dignified The present volume therefore is not intended to be a continuation of my History of Education before the Middle Ages and my treatment of the Middle Ages and the Transition to Modern Times To a certain extent it duplicates material toward the end of the latter volume and it largely anticipates my History of Education in Modern Times but the nature and purpose of the present work are quite different I have felt that an account of the life and work of the men who during the past three centuries have introduced various innovations and reforms into modern education might contain interest and value for many who would never read a more comprehensive and unified production I have however made some attempt as well to present the social setting of each reformer About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
