## **Great Issues Of International Politics The International System And National Policy:**

*Great Issues of International Politics* Morton A. Kaplan, 1974      *Great Issues of International Politics* Morton A. Kaplan, 1972      *A History of International Political Theory* Hartmut Behr, 2009-12-18 Contemporary theory of international politics faces a twofold problem the critical engagement with legacies of national power politics in connection to 20th Century International Relations and the regeneration of notions of humanity This book contributes to this engagement by a genealogy of thoughts on war peace and ethics      **John F. Kennedy and the Politics of Arms Sales to Israel** Abraham Ben-Zvi, 2012-12-06 This volume seeks to reconstruct the process by which the Kennedy administration decided to sell to Israel Hawk surface to air missiles It argues that both domestic considerations and political calculations were part of a highly complex decision made by members of Washington's high policy elite      *Transnational Terrorism and State Accountability* Vincent-Joël Proulx, 2012-11-05 Every State has an obligation to prevent terrorist attacks emanating from its territory This proposition stems from various multilateral agreements and UN Security Council resolutions This study exhaustively addresses the scope of this obligation of prevention and the legal consequences flowing from its violation so as to provide greater clarity on governments counterterrorism duties and to enhance State accountability for preventable wrongs It defines the contents and contours of the obligation while placing critical emphasis on the mechanics of State responsibility Whether obscured by new technologies like the Internet the sophisticated cellular structure of some terrorist organisations or convoluted political realities the level of governmental involvement in terrorist activities is no longer readily discernible in every instance Furthermore the prospect of governments waging surrogate warfare through proxies also poses intractable challenges to the mechanism of attribution in the context of State responsibility This monograph sets out the shortcomings of the extant scheme of State responsibility while identifying a paradigm shift towards more indirect modes of accountability under international law a trend corroborated by recent State and institutional practice Drawing on varied legal and theoretical influences the study devises and prescriptively argues for the implementation of a strict liability inspired model grounded in the logic of indirect responsibility with a view to enhancing State compliance with counterterrorism obligations This shifts the policy focus squarely to prevention while promoting multilateralism and transnational cooperation Ultimately the legal and policy sensibilities underlying the book converge into a new theory of prevention in counterterrorism contexts From the Foreword by Judge Bruno Simma International Court of Justice Even if one might disagree with the bases on which the author constructs his argument the execution of the argument is solid and thorough The coverage of the major policy arguments and the available legal source materials is equally impressive Moreover the author's positions are genuinely progressive and present a fairly innovative solution in the form of a strict liability mechanism It behoves all scholars and practitioners of international law with an interest in combating international terrorism to consider the proposals outlined in this book *Transnational Terrorism and State Accountability* by Vincent Joël Proulx has been awarded the 2014 Myres

McDougal Prize for best book in Law Science and Policy from the Society of Policy Scientists      **Russia-Foreign Relations-United States** Air University (U.S.). Library,1976      *Institutionalizing State Responsibility* Vincent-Joël Proulx,2016-05-06 Since the 9 11 attacks international organizations have become actively engaged in devising counterterrorism strategies and frameworks This monograph examines the role UN organs can play in implementing the law of State responsibility in global security contexts using transnational terrorism as its principal case study The institutional mechanisms utilized by the UN in implementing State responsibility are assessed in detail shedding light on how the ICJ the General Assembly and the Security Council contribute to the implementation of State responsibility in the context of global security By acknowledging the Security Council s role as a post 9 11 legislator this book argues that the Council can play an important and sometimes determinant role in implementing a State s legal responsibility for failing to prevent terrorism both inside and outside the Chapter VII framework Featuring a discussion of the more controversial consequences flowing from State responsibility this monograph also explores the prospect of injured States adopting forcible measures against responsible States for their failures to prevent terrorism The book investigates whether self defence and other forcible reactions envisaged both inside and outside the Council can be reconciled with State responsibility principles      **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office,1976      **China and the International System** Xiaoming Huang,2013 This book considers the evolving relationship between China and the international system and the interaction between a China of profound change in its identity capability and influence and an international system that is itself experiencing a process of far reaching transformation It develops an analytical framework that allows us to capture understand and explain a more dynamic pattern of agent structure interaction in China s relationship with the international system By demonstrating a more dynamic and mutually constitutive relationship between China and the international system the book explores the extent to which both transform themselves in the process and provides a fuller and more effective assessment of the evolving nature of the relationship In doing so it addresses key issues in the current literature on the relationship of China and the international system and helps close the gap in our knowledge of the conditions and consequences of change and stability in the international system as a result of the change in distributions of power capability and influence among nation states      **American Book Publishing Record** ,2006      **Great Issues of International Politics** Morton A. Kaplan,1970      **Contemporary Issues in Politics & International Relations** Nesrin Kenar,2021-12-26 Conflict is a phenomenon as old as human history Although the actors and reasons have changed conflicts have occurred in every period of history In the pre Cold War era conflicts in the international system were experienced between states The conflicts during the Cold War mainly were interstate conflicts arising from the rivalry between the two blocs In this period it was expected that the threat to the security of a state would come from outside the borders of the state and from other states For this reason all the regulations made by the League of Nations which was established at the end of

the First World War and the United Nations which was established after the Second World War to protect international peace and security included the measures to be taken against the attack or threat of attack by one state against another state. However, the developments that took place right after the end of the Cold War confirmed that the risk of interstate conflict decreased and new security threats emerged in this period. The conflicts that emerged in the post Cold War period were separatist conflicts due to ethnic and religious reasons such as the former Yugoslavia and Georgia or intra border conflicts that occurred for other reasons such as in Syria. Upon the inadequacy of international organizations and international law to intervene in intra border conflicts, the concept of security was redefined and a transformation from the security of the state to the security of the individual took place. New security threats such as environmental security, human security, food security, terrorism, weapons of mass destruction, and pandemics have been identified. One of the reasons for the decrease in conflicts between states in the post Cold War period is that states mostly use soft power instead of military force in achieving their foreign policy goals. The structure of the international system is also a dynamic that affects conflicts. After the end of the bipolar system, the transformation of the international system is not yet complete. One of the most critical problems in today's world is the competition and struggle between states to become the future superpower. While the US wants the current status quo to continue, China is trying to change the status quo in its favour. The European Union is to become the dominant power in the international system after its transformation in the post Cold War period.

International Political Economy Benjamin J. Cohen, 2017-03-02. Prior to the 1970s, few serious efforts were made to bridge the gap between economics and political science in the study of international relations. Systematic scholarly analysis of International Political Economy (IPE) emphasizing formal integration of elements of orthodox market and political analysis is really of very recent origin. This volume brings together some of the most important research papers published in the modern field of IPE since its birth less than four decades ago, emphasizing work that has significantly advanced theoretical and analytical understandings. Coverage includes grand questions of systemic transformation and system governance as well as more narrowly focused explorations of the two most central issue areas of the world economy: trade and money and finance.
