

The Great Nutrition Robbery

One of America's foremost food experts warns:

- margarine may be even more likely to cause atherosclerosis than butter
- what you think is orange juice may contain only a small percentage of actual fruit juice
- experimental animals died when on a diet of substitute egg products
- you should not depend on soybean products as meat substitutes
- you may be hindering your child's health and development by bottle-feeding rather than breast-feeding
- the FDA encourages the manufacture of imitation foods
- and much, much more.

The Great Nutrition Robbery Beatrice Trum Hunter, 1978 Traditional foods which have nourished human beings throughout the centuries have undergone radical transformation New technologies have been developed that make possible the use of substitute ingredients as partial or even complete replacers of traditional ones Entirely new food products have been created which although attractive and palatable offer little or no nutritive value Completely synthetic foods have been fabricated as substitutes for real ones And this radical transformation of our foods continues in ever more extreme fashion This book explores in detail the reshaping of foods and raises questions about their impact on human health p 3
