Canberra became the RAF's first jet bomber and was manufactured under licence in the USA as the Martin B 57. In post war years the Vickers Viscount became the world's first turboprop airliner and eventually became Britain's best selling commercial aircraft whilst the de Havilland Comet became the world's first jet airliner. Despite Britain's recessionary years in the 50s and early 60s military success came with the beautiful Hawker Hunter, the super sonic Fairey Delta experimental aircraft that broke the World Air Speed Record and the Vickers Valiant that pioneered the operational techniques to deliver Britain's nuclear deterrent. Later there followed the Mach 2 English Electric Lightning and the ill fated TSR 2 the cancellation of which is still regarded as one of the greatest mistakes ever made in British aviation history. Finally the Harrier the world's first vertical take off and landing jet fighter that is still in service and now only being built in the USA. Finally the Harrier the world's first vertical take off and landing jet fighter still in service and now being further developed in the USA.

G-Force: Flying the World's Greatest Aircraft James Bennet, 2016-10. Read what military pilots have to say about flying some of the most incredible fighting aircraft ever built. It's like a 20 million strap on carnival ride. AH 64 Apache Pilot: I had high expectations and it's beat every one of those. The whole jet is awesome. F/A 18F Super Hornet pilot: The role of the pilot has changed hugely in the last sixty years of military aviation. Jet pilots in the 1960s flying types such as the Harrier and F 102 would have spent a huge portion of their concentration just keeping the aircraft under control. That left little spare mental capacity to locate and engage the enemy. Today the opposite is true. Computers have made flying so simple that it is now considered very easy to fly the SAAB Gripen or Lockheed Martin F 35 Lightning II allowing the pilot to focus fully on his or her mission. G Force Flying the World's Greatest Aircraft is a celebration of the experience of flying some of aviation's most spectacular powerful and dangerous machines from early jet fighters such as the F 86 Sabre and MiG 15 to today's F 22 Raptor and Eurofighter Typhoon. Packed with first hand interviews with test and combat pilots from the world's air forces and illustrated with extensively researched and striking imagery G Force Flying the World's Greatest Aircraft is a thrilling ride alongside the pilots who fly the aircraft every day. Featuring first hand accounts of combat over Korea in the MiG 15 endurance missions in the B 2 and bombing Iraqi targets in the Tornado this book puts the reader directly in the pilot's seat and will appeal to aviation enthusiasts of all ages.

Flight Mark Phelps, 2013-12-13. Facts, photos, stories and specs of one hundred remarkable flying machines from the Sopwith Camel to the 747 to the supersonic F 22 Raptor. Of all humanity's dazzling innovations perhaps none captures our imaginations or fuels our inventive spirits as much as flight. In our quest to soar higher, faster and farther we've dreamed up airborne wonders that are a sight to behold like the supersonic F 22 Raptor stealthily soaring above the clouds or the Boeing Stearman PT 17 Biplane the beautiful starter model that helped a generation earn their wings or the deluxe Concorde the first passenger jet to cruise at the speed of sound. These iconic aircraft and ninety seven more stunning feats of aeronautical engineering make up the world's most groundbreaking contributions to flight all curated and collected here by the experts at Flying magazine. In Flight 100 Greatest Aircraft there's
