Currie,1994-01-01 **The Great Dinosaur Mystery Solved!** Ken Ham,2000-04 Book presents dinosaurs as part of God s creation and uses them to introduce Biblical concepts **Dinosaurs** W. D. Matthew, Pal ontology deals with the History of Life Its time is measured in geologic epochs and periods in millions of years instead of centuries Man by this measure is but a creature of yesterday his forty centuries of civilization 1 but a passing episode It is by no means easy for us to adjust our perspective to the immensely long spaces of time involved in geological evolution We are apt to think of all these extinct animals merely as prehistoric to imagine them all living at the same time and contending with our cave dwelling ancestors for the mastery of the earth In order to understand the place of the Dinosaurs in world history we must first get some idea of the length of geologic periods and the immense space of time separating one extinct fauna from another The Age of Man Prehistoric time as it is commonly understood is the time when barbaric and savage tribes of men inhabited the world but before civilization began and earlier than the written records on which history is based This corresponds roughly to the Pleistocene epoch of geology it is included along with the much shorter time during which

civilization has existed in the latest and shortest of the geological periods the Quaternary It was the age of the mammoth and the mastodon the megatherium and Irish deer and of other quadrupeds large and small which are now extinct but most of its animals were the same species as now exist It was marked by the great episode of the Ice Age when considerable parts of the earth s surface were buried under immense accumulations of ice remnants of which are still with us in the icy covering of Greenland and Antarctica
