Steam Trains Colin Maggs, 2014-09-15 The history of

steam in Britain from the Rocket in 1829 through to the last main line locomotive in the 1960s The GWR Handbook David Wragg,2017-08-01 For many the GWR was synonymous with holidays by the sea in the West Country but it was built to serve as a fast railway line to London especially for the merchants and financiers of Bristol Its operations stretched as far as Merseyside it provided most services in Wales and it was the main line to Cardiff Bristol Cornwall and Birmingham This book a classic first published in 2006 reveals the equipment stations network shipping and air services bus operations including Western National and overall reach and history of the GWR Forming part of a series along with The LMS Handbook The LNER Handbook and The Southern Railway Handbook this new edition provides an authoritative and highly detailed reference of information about the GWR **The Railway Preservation Revolution** Jonathan Brown,2017-06-30 A ride on a steam train is a popular family outing More than 100 heritage railways cater for that demand capturing the spirit of nostalgia while preserving the engines and equipment of past days of rail travel Their interests even extend to the modern era of 1960 s 70 s diesels Those heritage railways themselves have a long pedigree back to 1951 when a group of enthusiasts saved the Talylyn Railway in mid Wales from closure They ran this railway as volunteers out of their love of the little trains and a desire to keep it going Their example was followed by many more preservation societies who preserved and restored branch lines country lines and industrial lines for our enjoyment now Six decades have passed and we are now beginning to realize what an impressive history the heritage railway movement has This book traces that history from the humble beginnings the hopes and ambitions of the pioneers on the different railway projects There were times of failure and frustration as some fell by the wayside but others have made it through times of adversity to become the major heritage businesses of today **The Railway Magazine** ,1907 **The Principles of Physiology Applied to the Preservation of Health, and to the Improvement of Physical and Mental Education** Andrew Combe,1842 Classic British Steam Locos compiled from Wikipedia entries and published byby DrGoogelberg,2012-06-11 do you want to know everything on steam locos how they work Read about the technology and lots of steam locos like the flying Scotsman Compiled from Wikipedia pages and published by dr Googelberg GWR Collett Castle Class Keith Langston,2015-03-30 The Castle class 4 6 0 locomotives designed by Charles Collett and built at Swindon Works were the principal passenger locomotives of the Great Western Railway The 4 cylinder locomotives were built in batches between 1923 and 1950 the later examples being constructed after nationalisation by British Railways In total 171 engines of the class were built and they were originally to be seen at work all over the Great Western Railway network and later working on the Western Region of British Railways The highly successful class could be described as a GWR work in progress because further development took place over almost all of the locomotives working lives In addition to inspiring other locomotive designers the Castle class engines were proved to be capable of outstanding performances and when introduced were rightly described as being Britain s most powerful passenger locomotives Some of the Castles survived in service for over 40 years and individually clocked up just a little short

of 2 million miles in traffic In this book Keith Langston provides a definitive chronological history of the iconic class together with archive photographic records of each GWR Castle locomotive Many of the 300 plus images are published for the first time In addition background information on the origin of the names the engines carried including details of the many name changes which took place are also included The extra anecdotal information adds a fascinating glimpse of social history Collett CASTLE Class is a lavishly illustrated factual reference book which will delight steam railway enthusiasts in general and in particular those with a love of all things Great Western **Fish Preservation and Refrigeration** J. Great Western Star Class Locomotives Laurence Waters, 2017-04-30
Designed by G J Churchward no 40 was constructed at Swindon in April 1906 It was Swindon's first 4 cylinder simple engine and was the forerunner of Churchward's famous 4 cylinder Star Class 4 6 0s Initially built as a 4 4 2 Atlantic no 40 was named North Star in September 1906 rebuilt as a 4 6 0 in 1909 and renumbered 4000 in 1913 Including no 40 the Star class eventually numbered seventy three locomotives all built at Swindon in batches between 1906 and 1923 In service the Stars proved to be both free running and reliable locomotives and for many years were used to haul the Great Western's top link services including the world famous Cornish Riviera Express The introduction of the Collett Castle Class 4 6 0s in 1923 and the King Class 4 6 0s in 1927 saw the Stars relegated to secondary passenger freight and parcels services A number of Stars were rebuilt by Collett as Castles including the prototype no 4000 North Star but the remaining Stars continued to give good service At Nationalisation in 1948 no less than forty seven of these fine locomotives passed into Western Region ownership the last example no 4056 Princess Margaret being withdrawn in October 1957 In this book Laurence Waters charts the history of the class from the prototype right through to the final workings in October 1957 Using many previously unpublished photographs from the Great Western Trust photographic collection accompanied by informative captions every member of the Class is illustrated This book should appeal to those interested in the history of Great Western locomotive development as well as modellers of the Great Western and Western Region

An Introduction to Great Western Locomotive Development Jim Champ, 2018-02-28 The first thought when contemplating a new study of the Great Western Railway locomotive fleet must surely be to ask what can there be left to say But there is no single source which gives a general introduction to the Great Western locomotive fleet There are monographs on individual classes an excellent multi volume detail study from the RCTS and superb collections of photographs but nothing that brings it all together This work is intended to provide that general introduction The volume begins with a series of short essays covering general trends in design development whilst the main body of the volume covers individual classes For each class there is a small table containing some principal dimensions and paragraphs of text covering an introduction renumbering key changes in the development of the class and information on withdrawal The volume concludes with appendices covering the development and types of standard boilers the various numbering schemes used by the GWR the arcane subject of locomotive diagrams and lot numbers and a short reference on the many lines the GWR engulfed The majority of illustrations are new profile drawings to a consistent format Described as sketches they are drawn to a consistent scale but do not claim to be scale drawings Much minor equipment has been omitted and the author has certainly not dared to include rivets Although most are based around GWR weight diagrams they are not simple traces of the original drawings Detail has been added from other

sources components copied from different drawings and details have been checked against historical and modern photographs One must also bear in mind that steam locomotives were not mass produced Minor fittings frequently varied in position and changes were made over the locomotives lifetimes Nevertheless this collection of drawings provides a uniquely consistent view of the GWR locomotive fleet The Seasoning and Preservation of Timber Ernest George Blake,1925
