**Great Country House Disasters** Hugh Vickers, Caroline McCullough, 1983  
Ben Cowell, 2024 British country houses have experienced a renaissance since the early 1970s. A new accord is needed today recognising the increasingly contested contribution of country houses to British cultural life. Fifty years ago the future for country houses in Britain looked bleak. The Victoria and Albert Museum's exhibition *The Destruction of the Country House* which opened in October 1974 charted the loss of over a thousand country houses in the preceding century. The makers of the exhibition warned that history could be about to repeat itself because of the threats besetting mansion properties principally from higher taxation. Houses faced the prospect of having to be stripped of their collections and sold for use as offices, hotels or hospitals with their parks and gardens turned into golf clubs. Government might afford to save just a handful of the most significant of these places working in tandem with charities such as the National Trust. The rest would be consigned to history. This book traces the history of country houses in Britain from the *Destruction* exhibition to the present day. The wave of country house losses anticipated in 1974 never actually happened. Instead over the next five decades Britain's country houses experienced a renaissance. Fiscal rules changed in the mid 1970s to make it easier for owners to hold on to their assets. Economic improvements in the 1980s and 1990s allowed many houses and estates to develop profitable commercial businesses. All of this was achieved only after dedicated campaigning from heritage organisations in support of the country house cause. The book argues that a new accord is needed today to recognise and value the ongoing if increasingly contested contribution of country houses to British life and culture in the twenty first century.

**Dictionary of British Cartoonists and Caricaturists** Mark Bryant, Simon Heneage, 2022-01-25 Originally published in 1994 this dictionary provides a unique who's who of the major figures in the world of British cartoons and caricatures. It was the first book to encompass the entire field from c 1730 when Hogarth published the first of his modern moral pictures to 1980. In addition to describing the careers and achievements of the artists and the characteristics of their styles more than 500 entries give details of their publications, their illustrations to books and periodicals, exhibitions of their work, public collections in which their work is represented and literature on or referring to them. More than 150 illustrations are included. This is a comprehensive reference work and will be of interest to social and political historians as well as cartoon and caricature enthusiasts.

**Travel and the British country house** Jon Stobart, 2017-11-06 *Travel and the British country house* explores the ways in which travel by owners, visitors and material objects shaped country houses during the long eighteenth century. It provides a richer and more nuanced understanding of this relationship and how it varied according to the identity of the traveller and the geography of their journeys. The essays explore how travel on the Grand Tour and further afield formed an inspiration to build or remodel houses and gardens, the importance of country house visiting in shaping taste amongst British and European elites and the practical aspects of travel including the expenditure involved. Suitable for a scholarly audience including postgraduate and

undergraduate students but also accessible to the general reader Travel and the British country house offers a series of fascinating studies of the country house that serve to animate the country house with flows of people goods and ideas
