Poetry, Politics, and Culture Harold Kaplan, 2017-07-05 A salient feature of modern poetics is its direct connection with cultural history and politics Among the great American poets of the twentieth century Wallace Stevens and William Carlos Williams offer a significant contrast with T S Eliot and Ezra Pound Where the latter advocated a theocentric or reactionary response to the cultural crises of modernity the former affirmed an essentially humanist and democratic social and aesthetic ethos In Poetry Politics and Culture Harold Kaplan offers a penetrating comparative study of these representative and distinctively influential poets All four poets wrote in an atmosphere of cultural crisis following World War I caught as they were between outmoded belief systems and various forms of artistic and political nihilism While each believed in poetry as a source of cultural values and beliefs they nevertheless experienced loss of confidence in their own vocation in a world characterized by scientific rationalist thinking and the mundane struggle for survival For each therefore the poetic imagination was a means of restoring order or building a new civilization out of chaos In trying to define a revitalized culture the four exemplified the perennial quarrel between Europe and America

Poetry in a Global Age Jahan Ramazani, 2020-10-29 Ideas culture and capital flow across national borders with unprecedented speed but we tend not to think of poems as taking part in globalization Jahan Ramazani shows that poetry has much to contribute to understanding literature in an extra national frame Indeed the globality of poetry he argues stands to energize the transnational turn in the humanities Poetry in a Global Age builds on Ramazani's award winning A

Transnational Poetics a book that had a catalytic effect on literary studies Ramazani broadens his lens to discuss modern and contemporary poems not only in relation to world literature war and questions of orientalism but also in light of current debates over ecocriticism translation studies tourism and cultural geography He offers brilliant readings of postcolonial poets like Agha Shahid Ali Lorna Goodison and Daljit Nagra as well as canonical modernists such as W B Yeats Wallace Stevens T S Eliot and Marianne Moore Ramazani shows that even when poetry seems locally rooted its long memory of forms and words its connections across centuries continents and languages make it a powerful imaginative resource for a global age This book makes a strong case for poetry in the future development of world literature and global studies Brain of the Earth's Body

Donald Preziosi, 2003 What begins as a meditation on the museum by one of the world's leading art historians becomes in this book a far reaching critical examination of how art history and museums have guided and controlled not only the way we look at art but the ways in which we understand modernity itself Originally delivered as the 2001 Slade Lectures in the Fine Arts at Oxford University the book makes its deeply complex argument remarkably accessible and powerfully clear Concentrating on a period from the beginning of the nineteenth century to the beginning of the twentieth Donald Preziosi presents case studies of major institutions that he argues have defined and are still defining the possible limits of museological and art historical theory and practice These include Sir John Soane's Museum in London preserved in its 1837 state the Crystal Palace Exhibition of 1851 and four museums founded by Europeans in Egypt in the late nineteenth century which divided up that country's history into ethnically marked aesthetic hierarchies and genealogies that accorded with Europe's construction of itself as the present of the world's past and the brain of the earth's body Through this epistemological and institutional archaeology Preziosi unearths the outlines of the more radical Enlightenment project that academic art history professional museology and art criticism have rendered marginal or invisible Finally he sketches a new theory about art artifice and visual signification in the cracks and around the margins of the secular theologisms of the globalized imperial capital called modernity Addressed equally to the theoretical and philosophical foundations of art history museology history and anthropology this book goes to the heart of recent debates about race ethnicity nationality colonialism and multiculturalisms and to the very foundations of modernity and modern modes of knowledge production **The Collected Poems** James Joseph
