Quantum Gravity War Norbert Schwarzer, 2024-04-16 Imagine a civilization with a technology so powerful that a single push of the wrong button could destroy this very entire civilization As the consideration of future warfare requires the inclusion of a unified physics we have to deal with complex concepts of Quantum Theory and General Theory of Relativity The two have to be brought together before we are able to deal with the matter of future warfare technology in a satisfactory manner That such a Theory of Everything or Theory of Quantum Gravity in principle already exists and had been already derived by the great German mathematician David Hilbert When digging deeper and looking for applications of the new theory we realized that many of the new possibilities could also lead to quite disastrous utilizations in military It is futile to hope that mankind would not recognize this potential and restrain itself from its exploitation Thus we thought we better

make this knowledge public and hope for some kind of global understanding perhaps guaranteeing the non usage of certain technologies It might only be a weak hope but in observing history and realizing how little we gained by keeping crucial knowledge restricted to some thereby often only even more provoking the development of the most horrific weapons one could imagine at the time we simply see no better way This book does not provide blueprints ready to start the developments of new quantum gravity weaponry and strategies but it draws the line that would suffice to awake the right forces and trigger the best developments before the bad guys get the gist
