African Americans in the U.S. Economy Cecilia Conrad,2005 Over the last several decades academic discourse on racial inequality has focused primarily on political and social issues with significantly less attention on the complex interplay between race and economics African Americans in the U S Economy represents a contribution to recent scholarship that seeks to lessen this imbalance This book builds upon and significantly extends the principles terminology and methods of standard economics and black political economy Influenced by path breaking studies presented in several scholarly economic journals this volume is designed to provide a political economic analysis of the past and present economic status of African Americans The chapters in this volume represent the work of some of the nation s most distinguished scholars on the various topics presented The individual chapters cover several well defined areas including black employment and unemployment labor market discrimination black entrepreneurship racial economic inequality urban revitalization and black economic development The book is written in a style free of the technical jargon that characterizes most economics textbooks While the book is methodologically sophisticated it is accessible to a wide range of students and the general public and will appeal to academicians and practitioners alike The Black Social Economy in the Americas Caroline Shenaz Hossein,2017-09-18

This pioneering book explores the meaning of the term Black social economy a self help sector that remains autonomous from the state and business sectors With the Western Hemisphere's ignoble history of enslavement and violence towards African peoples and the strong anti black racism that still pervades society the African diaspora in the Americas has turned to alternative practices of socio economic organization Conscientious and collective organizing is thus a means of creating meaningful livelihoods In this volume fourteen scholars explore the concept of the Black social economy bringing together innovative research on the lived experience of Afro descendants in business and society in Argentina Brazil Canada Colombia Guyana Haiti Jamaica and the United States The case studies in this book feature horrific legacies of enslavement colonization and racism and they recount the myriad ways that persons of African heritage have built humane alternatives to the dominant market economy that excludes them Together they shed necessary light on the ways in which the Black race has been overlooked in the social economy literature
