The Practice of Politics in Postcolonial Brazil Roger A. Kittleston, 2005-12-30 The Practice of Politics in Postcolonial Brazil traces the history of high and low politics in nineteenth century Brazil from the vantage point of the provincial capital of Porto Alegre In the immediate postcolonial period new ideas about citizenship and freedom were developing and elites struggled for control of the state as the lower classes sought inclusion in political life In a shift from the Liberal Party to Positivist or Conservative rule during the bloody Federalist Revolt of 1893 1895 new leaders sought to bring about a more balanced structure of government where the capitalist was sympathetic to the worker and the worker more passive toward the elite This represented a complete change of opinions a new regime of ideas Termed a scientific approach by its proponents the movement was based on historical process and would be brought about through civic education Against the backdrop of the abolition of slavery and subsequent assimilation the rise of European immigration and industrialization Kittleston investigates how the people shaped changing political ideologies and practices and how through local struggles and changes in elite ideology the lower classes in Porto Alegre won limited political inclusion that was denied elsewhere

Slaves, Peasants, and Rebels Stuart B. Schwartz, 1996 Once preoccupied with Brazilian slavery as an economic system historians shifted their attention to examine the nature of life and community among enslaved people Stuart B Schwartz looks at this change while explaining why historians must continue to place their ethnographic approach in the context of enslavement as an oppressive social and economic system Schwartz demonstrates the complexity of the system by reconsidering work resistance kinship and relations between enslaved persons and peasants As he shows enslaved people played a role in shaping not only their lives but Brazil s institutionalized system of slavery by using their own actions and attitudes to place limits on slaveholders A bold analysis of changing ideas in the field Slaves Peasants and Rebels provides insights on how the shifting power relationship between enslaved people and slaveholders reshaped the contours of Brazilian society

Sowing the Whirlwind Geert Arent Banck, Cornelis Wilhelmus Maria den Boer, 1991 These articles represent a multidisciplinary approach to the so called soya boom in Southern Brazil This crop has assumed such a dominant position in the agrarian development of the region since the early 1970s that soya has virtually become a metaphor for the profound transition which has taken place there Old structures of production have been eliminated with small scale agricultural producers in particular being driven from their land The result has been a large measure of social unrest but at the same time many have also seized new opportunities Of course soya has not been the only factor in this process of development but all the same this crop is the metaphor par excellence to typify the transition A fascinating aspect of this situation is the fact that a process of this kind is closely connected with developments in the international market in commodities and in the national market Without claiming to be comprehensive this collection of articles is an attempt to throw light on the various aspects of the process of change in the agrarian structure of Southern Brazil within the wider context of international and national developments
