**An Economic History of London, 1800-1914** Michael Ball, 2001 [Economic History London 1800-1914](#) Martin Ball, Sunde, 2000-09 [Large Databases in Economic History](#) Mark Casson, Nigar Hashimzade, 2013-11-20 Big data is now readily available to economic historians thanks to the digitisation of primary sources, collaborative research linking different data sets and the publication of databases on the internet. Key economic indicators such as the consumer price index can be tracked over long periods and qualitative information such as land use can be converted to a quantitative form. In order to fully exploit these innovations it is necessary to use sophisticated statistical techniques to reveal the patterns hidden in datasets and this book shows how this can be done. A distinguished group of economic historians have teamed up with younger researchers to pilot the application of new techniques to big data. Topics addressed in this volume include prices and the standard of living, money supply, credit markets, land values and land use, transport, technological innovation and business networks. The research spans the medieval, early modern and modern periods. Research methods include simultaneous equation systems, stochastic trends and discrete choice modelling. This book is essential reading for doctoral and post doctoral researchers in business, economic and social history. The case studies will also appeal to historical geographers and applied econometricians.

**Famines in European Economic History** Declan Curran, Lubomyr Luciuk, Andrew G. Newby, 2015-04-24 This volume explores economic, social and political dimensions of three catastrophic famines which struck mid nineteenth and early twentieth century Europe: the Irish Famine (An Gorta Mór) of 1845-1850, the Finnish Famine (Suuret Nälkävuodet) of the 1860s and the Ukrainian Famine (Holodomor) of 1932-1933. In addition to providing new insights into these events on international, national and regional scales, this volume contributes to an increased comparative historiography in historical famine studies. The parallel studies presented in this book challenge and enhance established understandings of famine tragedies, including famine causation and culpability, social and regional famine vulnerabilities, core-periphery relationships between nations and regions, degrees of national autonomy and self-sufficiency as well as famine memory and identity. *Famines in European Economic History* advocates that the impact and long-term consequences of famine for a nation should be understood in the context of evolving geopolitical relations that extend beyond its borders. Furthermore, regional structures within a nation can lead to unevenness in both the severity of the immediate famine crisis and the post-famine recovery. This book will be of interest to those in the fields of economic history, European history and economic geography.
