Islamic finance *The Financial Crisis in Constitutional Perspective* Poul F Kjaer, Gunther Teubner, Alberto Febbrajo, 2011-07-27 This volume presents the first thorough sociologically informed legal analysis of the financial crisis which unfolded in 2008 It combines a multitude of theoretically informed analyses of the causes dynamics and reactions to the crisis and contextualises these within the general structural transformations characterising contemporary society It furthermore explores the constitutional implications of the crisis and suggests concrete changes to the constitutional set up of contemporary society Although the question of individual responsibility is of crucial importance the central idea animating the volume is that the crisis cannot be reduced to a mere failure of risk perception and management for which individual and collective actors within and outside of financial organisations are responsible The 2008 crisis should rather be understood as a symptom of far deeper structural transformations For example contemporary society is characterised by massive accelerations in the speed with which societal processes are reproduced as well as radical expansions in the level of globalisation These transformations have however been asymmetrical in nature insofar as the economic system has outpaced its legal and political counterparts The future capability of legal and political systems to influence economic reproduction processes is therefore conditioned by equally radical transformations of their respective operational forms and self understanding Potentially the 2008 crisis therefore has far reaching constitutional implications **The Global Community Yearbook of International Law and Jurisprudence 2021** Giuliana Ziccardi Capaldo, 2022-10-14 The 2021 edition of The Global Community Yearbook of International Law and Jurisprudence constitutes the only thorough annual survey of major developments in international courts General Editor Giuliana Ziccardi Capaldo selects excerpts from important court opinions supported by contributors who provide expert guidance on those cases The topical organization and subject index make the thorough comprehensive content easy to navigate **Against the Current: Privatization, Water Markets, and the State in Chile** Carl J. Bauer, 2012-12-06 In 1981 Chile's military government dictated a new Water Code that radically changed the country's previous water rights system by strengthening private property rights favoring market incentives and reducing state regulation Against the Current Privatization Water Markets and the State in Chile is the first empirical and interdisciplinary study of water markets in Chile which is the leading international example of free market water policies Against the Current Privatization Water Markets and the State in Chile challenges the glowing reports given by neoliberals in Chile and the World Bank showing that the results of this economic experiment have actually been rather mixed Within the agricultural sector the Water Code has worked fairly well although the market incentives to conserve water have been ineffective and water rights trading has been less active than expected The Code's impact has been more negative at the level of river basins where the institutional framework has revealed critical flaws in coordinating multiple water users and resolving conflicts Against the Current Privatization Water Markets and the State in Chile combines law political economy and geography to analyze the disadvantages problems and wider contexts of water markets This book will appeal to everyone

interested in property rights market friendly environmental policies the political economy of sustainable development and the intersection of economics with law and institutions

World Society Anna L. Ahlers, Damien Krichewsky, Evelyn Moser, Rudolf Stichweh, 2021-03-05 This book is about the radical novelty of modern polities in a functionally differentiated world society Premodern states were at the apex of a stratified hierarchical society They dominated society and all its groups and strata Modern polities have to be understood through the ecology of relations among different function systems They have to find and incessantly redefine their place in society They produce decisions that are collectively binding but in preparing these decisions experience constraints and knowledge deficiencies that are related to the complexity of a functionally differentiated society The book concentrates on six analytical perspectives that reflect how modern polities are embedded into 21st century society These perspectives are the concept of inclusion and the inclusion revolution constitutive of modern polities the internal differentiation of polities that endows them with an unprecedented complexity the fact that polities do not know anything about society and the ways in which they compensate for this representation and responsiveness as strategies to reconnect with society the self restriction of some polities that brings about ever new autonomous expert organizations the symmetrical rise of autocracies and democracies as the two modern variants of political regimes
