Globalization and Economic Nationalism in Asia Anthony P. D'Costa, 2012-06-14 This volume documents the ways in which Asian governments have been pursuing economic nationalism It challenges the view that globalization renders the state redundant and demonstrates how they shape trade investment and financial outcomes Countries covered include India China South Korea Singapore Japan and the East Asian region

Constructing the International Economy Rawi Abdelal, Mark Blyth, Craig Parsons, 2011-03-15 Focusing empirically on how political and economic forces are always mediated and interpreted by agents both in individual countries and in the international sphere Constructing the International Economy sets out what such constructions and what various forms of constructivism mean both as ways of understanding the world and as sets of varying methods for achieving that understanding It rejects the assumption that material interests either linearly or simply determine economic outcomes and demands that analysts consider as a plausible hypothesis that economies might vary substantially for nonmaterial reasons that affect both institutions and agents interests Constructing the International Economy portrays the diversity of models and approaches that exist among constructivists writing on the international political economy The authors outline and relate several different arguments for why scholars might attend to social construction inviting the widest possible array of scholars to engage with such approaches They examine points of terminological or theoretical confusion that create unnecessary barriers to engagement between constructivists and nonconstructivist work and among different types of constructivism This book provides a tool kit that both constructivists and their critics can use to debate how much and when social construction matters in this deeply important realm

China's Challenges to Human Security Guoguang Wu, 2012-11-27 This book looks at human security in China's foreign relations It discusses the concept and theory of human security and their implications for China The book goes on to analyse environmental security issues including climate change and water resources as well as looking at issues from an energy consumption perspective Significant human security issues are then focussed on including food safety pandemic disease control migration and the human rights implications of China's overseas investment

the so called free market One is left with an impression that we live in a glorious utopia in which the crusaders of international capitalism continue in their quest to make life peaceful and better for all of humanity It is also a world which has been at peace for 70 years with no ideological or economic conflict and in which all of humanity live their lives in harmony benefiting from the fruits of globalization This claim is nothing less than the rearrangement of the deck chairs on the Titanic where the Titanic is actually the Global Economic Financial System GE FS storming its way through all countries and causing untold human suffering engineered by global pathocrats In this book Professor Tatah Mentan dissects human suffering from multidimensional crises such as terrorism population explosion denial of human rights economic inequality racial discrimination ideological extremism religious intolerance social injustice ecological imbalance consumerism oppression of the weak and so on He then calls for a radical global ethics that expects us to realize our roles and duties regarding global peace It includes the role and ideals of educationalists the duties of scientists philosophers and thinkers the inculcation of human values such as nonviolence and love *Global Political Economy* Theodore H. Roy,Arthur T. Denzau,Thomas D. Willett,2006-12-13 Critics of globalization often portray neoliberalism as an extremist laissez faire political economic philosophy that rejects government any sort of government intervention in the domestic economy Like most over used terms it is more complicated than this introductory sentence suggests This volume seeks to move beyond these caricature depictions and definitions as well as the emotional rhetoric that has unfortunately dominated both the scholastic and political debate on neoliberalism and global market oriented reform This book emphasizes that there are in fact a variety of neoliberalisms that share a common emphasis on the role of the market Beyond this however its usages and applications appear much more varied according to the cultural economic political and social context in which it is used A host of eminent contributors including Douglass C North Arthur T Denzau Thomas D Willett Mark Blyth Colin Hay Craig Parsons and others provide a rigorous assessment of the significance of neoliberal ideas on economic policy Through their detailed international case studies the contributors to this book show how varied its impact has in fact been and the result is a book that will stimulate further debate in this most controversial of subject matters Ravi K Roy is a Research Scholar at the Claremont Institute for Economic Policy Studies Arthur T Denzau is Professor of Economics at Claremont

Shaping Nations and Markets Vinícius Guilherme Rodrigues Vieira,2023-09-15 Shaping Nations and Markets employs a mixed methods approach to contend that economic ideas organization of domestic interests and their economic power asymmetries of information and political institutions do not sufficiently explain the formation of national interests in processes of trade liberalization The author proposes that something is missing identity capital which also empowers economic sectors that share either liberalizing or protectionist interests Identity capital is an economic sector s contribution to the stability of a national identity narrative it correlates with the degree to which the workforce of any sector represents the dominant conception of national identity Identity capital creates political power asymmetries among those sectors and impacts the formation of populist movements in both developed and developing states This book offers a theoretical framework to unpack national identity trade liberalization nationalist populism domestic politics and globalization The author argues that the key for identifying whether liberalizing or protectionist coalitions prevail in trade negotiations is identity capital He offers a comparison of the three largest contemporary federal multicultural democracies Brazil India and the United States from the Doha Development Round of the World Trade Organization WTO in 2001 to the rise of populism in these countries in recent years This book will be of great interest to graduate students and scholars of international relations international studies political science comparative politics and economic sociology
