The Architecture of Markets Neil Fligstein, 2018 Market societies have created more wealth and more opportunities for more people than any other system of social organization in history Yet we still have a rudimentary understanding of how markets themselves are social constructions that require extensive institutional support This groundbreaking work seeks to fill this gap to make sense of modern capitalism by developing a sociological theory of market institutions Addressing the unruly dynamism that capitalism brings with it leading sociologist Neil Fligstein argues that the basic drift of any one market and its actors even allowing for competition is toward stabilization The Architecture of Markets represents a major and timely step beyond recent largely empirical studies that oppose the neoclassical model of perfect competition but provide sparse theory toward a coherent economic sociology Fligstein offers this theory With it he interprets not just globalization and the information economy but developments more specific to American capitalism in the past two decades among them the 1980s merger movement He makes new inroads into the theory of fields which links the formation of markets and firms to the problems of stability His political cultural approach explains why governments remain crucial to markets and why so many national variations of capitalism endure States help make stable markets possible by for example establishing the rule of law and adjudicating the class struggle State building and market building go hand in hand Fligstein shows that market actors depend mightily upon governments and the members of society for the social conditions that produce wealth He demonstrates that systems favoring more social justice and redistribution can yield stable markets and economic growth as readily as less egalitarian systems This book will surely join the classics on capitalism Economists sociologists policymakers and all those interested in what makes markets function as they do will read it for many years to come

Informal Economies and Power Anna Danielsson, 2018-10-26 The global ubiquity of informal economic activities has turned informality into a key policy question not least in international peace and state building This book explores a core aspect of economic informality its resilience despite comprehensive international anti informality operations Using Kosovo as an illustrative case Danielsson suggests that to understand the resilience of informality two distinct areas of practice need to be studied in conjunction rather than separately The first concerns the professional practices enacted by international organisations in their attempts to formalise the informal economy in Kosovo The second area of practice concerns the everyday informal economic practices of social agents in Kosovo To study these areas of practice at their junction Danielsson uses Pierre Bourdieu s concept of symbolic power and argues that in post conflict Kosovo the distinct practices have become interwoven and co constitutive of a novel ordering and meaning of informality The resilience of the informal thus plays out through while undermining and reinforcing the need of the international anti informality operations Including scholarship from global governance global political economy and social theory this book s original perspective on informal economies and power will appeal to scholars and professionals located in peace studies development studies and the field of international relations

Economy and Society in Europe Luigi Burroni, Maarten Keune, Guglielmo Meardi, 2012 Drawing on the development of economic sociology over the past 40 years this book brings together leading scholars to explore the relationship between social institutions on economic processes Inspired in particular by the innovative and

creative dimensions of Colin Crouch's work they signpost directions for future research. It will be an important reader for international scholars exploring the unfolding dimensions of contemporary relations in economy and society. Jacqueline O'Reilly, University of Brighton Business School, UK. Improving our understanding of how economy and society interrelate in Europe is of paramount importance. The rigorous and thought provoking analyses about the interaction between markets and the institutions of society contained in this book undoubtedly represent an excellent example of how this improvement can be achieved especially in these times of crisis. Andr s Rodr guez Pose, London School of Economics, UK. This book offers a refreshing account of the deep changes occurring over recent years in the relationship between economy and society in Europe. This is of course a classical theme since Max Weber's work but the social institutions which shape economic performance have profoundly evolved as have the analytical categories used to understand them. The contributions in this volume provide a broad and interesting perspective dealing with issues as varied as industrial relations, welfare regimes, families and the labour market, universities, local governance and many others. In the wake of the financial crisis the major theories on the role of such institutions are found partly unsatisfactory as the boundaries between economy and society are constantly shifting. Everyone interested in improving our analytical tools to understand the direction of change in Europe should welcome this book. Marino Regini, University of Milan, Italy. While an economy is always embedded in society the relationship between the two is undergoing profound changes in Europe resulting in widespread instability which is emphasised by the current crisis. This book analyses these changes and in particular pressures of intensifying international competition, globalization and financialization within Europe. Combining the perspectives of economic sociology, political economy and political science the expert contributors offer an in depth multidisciplinary insight to the functioning of a number of institutional arenas around which European economies and societies are organized. Areas explored include the state and public policy at European, national and regional level, the welfare state, industrial relations, systems, education, systems and the family. This challenging and thought provoking book will be of great interest to a wide ranging audience across a number of disciplines including European studies, political science, comparative political economy, economic sociology, industrial relations and social policy.

The Varieties of Economic Rationality Michel Zouboulakis, 2014-01-21. The concept of economic rationality is important for the historical evolution of Economics as a scientific discipline. The common idea about this concept even between economists is that it has a unique meaning which is universally accepted. This new volume argues that economic rationality is not a universal concept with one single meaning and that it in fact has different if not conflicting interpretations in the evolution of discourse on economics. In order to achieve this the book traces the historical evolution of

the concept of economic rationality from Adam Smith to the present taking in thinkers from Mill to Friedman and encompassing approaches from neoclassical to behavioural economics The book charts this history in order to reveal important instances of conceptual transformation of the meaning of economic rationality In doing so it presents a uniquely detailed study of the historical change of the many faces of the homo oeconomicus **Globalised Minds, Roots in the City** Alberta Andreotti, Patrick Le Galès, Francisco Javier Moreno-Fuentes, 2015-02-16 Globalised Minds Roots in the City utilises empirical evidence from four European cities to explore the role of urban upper middle classes in the transformations experienced by contemporary European societies Presents new empirical evidence collected through an original comparative research about professionals and managers in four European cities in three countries Features an innovative combination of approaches methods and techniques in its analyses of European post national societies Reveals how segments of Europe s urban population are adopting exit or partial exit strategies in respect to the nation state Utilises approaches from classic urban sociology globalization and mobility studies and spatial class analysis Includes in depth interviews social networking techniques and classic questions of political representation and values **Economy, Work, and Education** Catherine Casey, 2016-07-27 Economy Work and Education Critical Connections addresses effects of neoliberal capitalism in particular regard to work and education The book elaborates key aspects and problems of generalized policy models of knowledge based economies and learning societies in contexts of liberalized firm action accelerated competitiveness and labor market flexibility It discusses limits and paradoxes of higher skilled knowledge based economies which include significant disparities in labor market absorption of higher level skills a deterioration of qualitative conditions of work and a re subordination of workers This volume provides a research intensive crossing of these fields to contribute a closer disciplinary and scholarly dialogue between interested thinkers across fields who too often must labor and converse apart It offers the vantage point afforded by traversing old boundaries and exploring concerns shared by many scholars and researchers in international circles in pursuit of social and cultural innovation in the governance of work and education and advancing wider social debate Enterprising Migrants in Berlin Baris Ülker, 2016-01-15 How has ethnic entrepreneurship emerged and developed since the late eighties in Berlin In his study Baris lker answers this question by relying on the experiences of immigrants from Turkey Most academic studies on ethnic entrepreneurship have focused either on the most unitary structure available in the natural flow of history or on the pre given cultural characteristics of immigrants This book instead sets historical ruptures conditions of possibility and individual practices in context It analyzes how human beings have been turned into ethnic entrepreneurs and explains the ways of governing the self and others in the neoliberal urban context *Cities and Economic Change* Ronan Paddison, Tom Hutton, 2014-11-28 An invaluable text for all those interested in cities and economic change Empirically grounded theoretically informed and written in a highly accessible way to help students understand processes underlying the changing urban economy urban governance and the role of place Lily Kong National University of

000 graduates This report presents the major findings and draws important policy implications
