Personnel Selection and Classification Michael G. Rumsey, Clinton B. Walker, James H. Harris, 2013-05-13 Bringing together several key elements needed to identify the most promising themes for future research in selection and classification this book's underlying aim is to improve job performance by selecting the right persons and matching them most effectively with the right jobs An emphasis is placed on current innovative research approaches which in some cases depart substantially from traditional approaches The contributors consisting of professionals in measurement personnel research and applied and military psychology discuss where the quantum advances of the last decade should take us further Comprehensive coverage of the selection and classification domain is provided including a broad range of topics in each of the following areas performance conceptualization and measurement individual differences and selection and classification decision models The presentations in each of these areas are integrated into a set of coherent themes This integration was the product of structured group discussions which also resulted in a further evolution of some of the ideas presented *The Blackwell Handbook of Personnel Selection* Arne Evers, Neil Anderson, Olga Smit-Voskuil, 2009-02-04 The Blackwell Handbook of Personnel Selection provides a state of the art review of theory research and professional practice in the field of selection and assessment Reviews research and practical developments in all of the main selection methods including interviews psychometric tests assessment centres and work sample tests Considers selection from the organization's and the applicant's perspective and covers the use of new technology in selection and adverse impact issues Each section includes

contributions from internationally eminent authors based in North America and Europe *Development of a Personal Computer-based Enlisted Personnel Allocation System (PC-EPAS)* ,2001 Exploring the Limits in Personnel Selection and Classification John P. Campbell,Deirdre J. Knapp,2013-06-17 Beginning in the early 1980s and continuing through the middle 1990s the U S Army Research Institute for the Behavioral and Social Sciences ARI sponsored a comprehensive research and development program to evaluate and enhance the Army s personnel selection and classification procedures This was a set of interrelated efforts collectively known as Project A Project A had a number of basic and applied research objectives pertaining to selection and classification decision making It focused on the entire selection and classification system for Army enlisted personnel and addressed research questions that can be generalized to other personnel systems It involved the development and evaluation of a comprehensive array of predictor and criterion measures using samples of tens of thousands of individuals in a broad range of jobs The research included a longitudinal sample from which data were collected at organizational entry following training after 1 2 years on the job and after 3 4 years on the job This book provides a concise and readable description of the entire Project A research program The editors share the problems strategies experiences findings lessons learned and some of the excitement that resulted from conducting the type of project that comes along once in a lifetime for an industrial organizational psychologist This book is of interest to industrial organizational psychologists including experienced researchers consultants graduate students and anyone interested in personnel selection and classification research *Workload Transition* National Research Council,Division of Behavioral and Social Sciences and Education,Board on Human-Systems Integration,Panel on Workload Transition,1993-02-01 Workload transition is a potentially crucial problem in work situations wherein operators are faced with abrupt changes in task demands People involved include military combat personnel air traffic controllers medical personnel in emergency rooms and long distance drivers They must be able to respond efficiently to sudden increases in workload imposed by a failure crisis or other often unexpected event This book provides a systematic evaluation of workload transition It focuses on a broad spectrum of activities ranging from team cooperation to the maintenance of this problem on a theoretical level and offers several practical solutions The Substitutability of Criteria in the Development and Evaluation of ASVAB Classification Procedures Joseph Zeidner,1998 **Cognitively Diagnostic Assessment** Paul D. Nichols,Susan F. Chipman,Robert L. Brennan,2012-12-06 During the past two or three decades research in cognitive science and psychology has yielded an improved understanding of the fundamental psychological nature of knowledge and cognitive skills that psychological testing attempts to measure These theories have reached sufficient maturity making it reasonable to look upon them to provide a sound theoretical foundation for assessment particularly for the content of assessments This fact combined with much discontentedness over current testing practices has inspired efforts to bring testing and cognitive theory together to create a new theoretical framework for psychological testing a framework developed for diagnosing learners differences rather than

for ranking learners based on their differences This volume presents some initial accomplishments in the effort to bring testing and cognitive theory together Contributors originate from both of the relevant research communities cognitive research and psychometric theory Some represent collaborations between representatives of the two communities others are efforts to reach out in the direction of the other community Taking fundamentally different forms psychometric test theory assumes that knowledge can be represented in terms of one or at most a few dimensions whereas modern cognitive theory typically represents knowledge in networks either networks of conceptual relationships or the transition networks of production systems Cognitively diagnostic assessment is a new enterprise and it is evident that many challenging problems remain to be addressed Still it is already possible to develop highly productive interactions between assessment and instruction in both automated tutoring systems and more conventional classrooms The editors hope that the chapters presented here show how the reform of assessment can take a rigorous path

2000 Assessment of the Office of Naval Research's Marine Corps Science and Technology Program National Research Council, Commission on Physical Sciences, Mathematics, and Applications, Naval Studies Board, Committee for the Review of ONR's Marine Corps Science and Technology Program, 2000-11-14 This review of the Science and Technology S T program of the Office of Naval Research's ONR's Expeditionary Warfare Operations Technology Division Code 353 comes at a time of considerable change in the Marine Corps and in ONR which are currently in the midst of significant transitions The Marine Corps is making plans to equip and train for engaging in a new style of warfare known as Operational Maneuver From the Sea OMFTS and for performing a wide variety of missions in urban settings ranging from humanitarian assistance to combat and mixes of these suggested by the term three block war During 1999 ONR assumed management of that portion of the Marine Corps S T program that had not been assigned several years earlier to the Marine Corps Warfighting Laboratory MCWL In 2002 control of most of ONR's advanced development funding 6 3 and of much of its exploratory development funding 6 2 will move from ONR's line divisions of which Code 353 is one of many to 12 new program offices each dedicated to demonstrating technologies for future naval capabilities FNCs Given these changes it is not surprising that some of the projects inherited recently by ONR and assessed by the Committee for the Review of ONR's Marine Corps Science and Technology Program under the auspices of the Naval Studies Board of the National Research Council differed from the customary ONR project and were more akin to preacquisition or acquisition support than to S T It is also not surprising that Code 353 could not articulate its plans for future investments clearly and concisely given the current uncertainty about the content of and funding level for FNCs The Marine Corps S T program supports the five imperatives for technology advancement that the Marine Corps Combat Development Command MCCDC has identified as prerequisites for the transition to OMFTS maneuver firepower logistics training and education and command and control The committee supports investment in these areas and in the report's discussions and recommendations follows the five imperatives

ASVAB Correlations are Lower for

Higher Aptitude Groups Peter J. Legree, 1997 Previous research demonstrates that correlations among IQ tests are lower when estimated using higher scoring individuals However this phenomenon has only been documented using individually administered measures of intelligence and attempts to extend the demonstration to other specialized aptitudes have failed The present study divides the 1980 Armed Services Vocational Aptitude Battery ASVAB weighted norming sample into five aptitude levels with similar levels of variance Analyses show that the ASVAB tests are less correlated within higher aptitude groups provided that the scales used to define the groups are psychometrically sound for three highly skewed ASVAB tests a ceiling effect prevents this phenomenon for the remaining seven tests the phenomenon replicates and the magnitude of the effect is proportional to the skewness of the scale $r = .85$ These findings support the assertion that cognitive aptitudes are less correlated in higher aptitude groups imply that greater classification effects can be associated with higher scoring groups and qualify the use of the multivariate correction for restriction of range DTIC
