

## **Open-access, Common-property and Natural Resource Management**

Chapter 6 in *Economics of Environmental Conservation* (Second Edition) (2005) by Clement A Tisdell. Published by Edward Elgar, Cheltenham, UK and Northampton, MA, USA. ISBN: 1 84376 614 0

### **6.1 Types of Property and General Consequences**

The nature of ownership of resources, that is the nature of ownership of property, can have important consequences for the conservation of resources and the economic efficiency with which resources are used, protected and developed. If wildlife is an open-access resource, a resource to which all have free access and if it is valuable for direct use, its existence can be threatened and paradoxically the more valuable it becomes the more likely is it to be brought to the brink of extinction by overharvesting. The property of all is frequently the concern of none and usually such property is not adequately protected and husbanded.

The nature of ownership of resources may take many forms. At one extreme, ownership may involve a single owner with the exclusive right to enjoy (or to exchange) any product flowing from that resource, to use up the stock of that resource and to assign the resource together with improvements (and the rights attaching to it) to others. This is an extreme case of private property. More complicated cases arise when a resource is jointly owned by a number of persons as in a partnership, co-operative or company and when the group has the same rights as mentioned above for a single owner. Joint ownership of resources can also occur in some local communities. These cases are complicated because we cannot assume that a group will act in the same way as an individual. The way in which a group can be expected to behave will depend on the size of the group, its articles of association and the nature of the organisation for conducting its business. Private rights, however, to use a resource may be restricted or use may not be entirely exclusive. The use of a property may be subject to conditions or covenants imposed by the state or by vendors or those assigning property, in some cases.

At the other extreme to pure private property is common-property to which all have access. In the open-access case, everyone is free to use the resource. Individuals or groups of individuals gain no property rights from conserving the resource or undertaking investment to increase its economic value or its productivity. Such property is sometimes described as *res nullum* - a thing belonging to no one.

This contrasts with *res communis*- a thing belonging to a community. In this case, access and use of the resource is regulated by the community. In our society, public parks might be considered to be *res communis* because the purposes for which they can be used are regulated. In
