Activating Critical Thinking to Advance the Sustainable Development Goals in Tourism Systems Karla A. Boluk, Christina T. Cavaliere, Freya Higgins-Desbiolles, 2021-05-12 Activating Critical Thinking to Advance the

Sustainable Development Goals in Tourism Systems focuses on the role of critical thinking and inquiry in the implementation of the 2030 Sustainable Development Goals (SDGs) in tourism systems. The impetus for the development of this book emerged from the declaration by the United Nations (UN) General Assembly of 2017 as the International Year of Sustainable Tourism for Development. This declaration purposely positions tourism as a tool to advance the universal 2030 Agenda for Sustainable Development and the 17 SDGs thus mutually serving as an opportunity and responsibility to appraise from a critical lens what the SDGs signify and how they can be understood from multiple perspectives. The chapters in the book foster the next phase of sustainable tourism scholarship that actively considers the interconnections of the UN's SDGs to tourism theory and praxis and activates critical thinking to analyze and advance sustainability in tourism systems. It articulates the need for the academy to be more intrinsically involved in ongoing iterations of multilateral accords and decrees to ensure they embody more critical and inclusive transitions toward sustainability as opposed to market-driven neoliberal directives. The contributions in this book encourage various worldviews challenging shaping and more critically reflecting the realities of global communities as related to and impacted by sustainable tourism development. The chapters in this book were originally published as a special issue of the *Journal of Sustainable Tourism*.

*The Demilitarized Zone (DMZ) of Korea* Kwi-Gon Kim, 2013-08-28. Untouched since 1953, the Korean DMZ (Demilitarized Zone) has transformed itself into one of the few ecologically pristine zones and a vital habitat for endangered species. Often cited as a potential peace park, it could one day be a common ground for reconciliation and harmony. A wealth of data and information has been produced over time documenting significant aspects of the DMZ and its implications for human and ecological security both in Korea and worldwide. However, there is no single book in English that brings together the findings on the mechanism of evolution, the ecology and biodiversity of the DMZ. *The DMZ of Korea* by Kwi-Gon Kim is the first step in this direction. It seeks to link scientific information and policy making for the future DMZ ecosystem management, taking into account the fact that the area has become over the years a natural treasure as a habitat for rare birds and other wildlife and a fertile environment for a thriving plant community. It also provides a framework for ensuring the long-term sustainability of the DMZ. The book holistically describes the current environmental status of the DMZ and identifies bioregions, resources, habitats, and species. By outlining the current scientific data and information needed to classify the different wetland types, assess the biological integrity, understand the threat factors, and to suggest conservation and management strategies, the book provides a one-stop scientific and policy source of information which will undoubtedly be of great interest to students, researchers, practitioners, and policy decision makers in the areas of planning, natural resource management, public management, ecology, landscape architecture, geography, and the life sciences. Prof. Dr. Kwi-Gon Kim obtained his Ph.D. at UCL University of London, UK. He is a professor emeritus at Seoul National University and the Co-President of the Korea DMZ Council in Seoul, Korea.
