Environmental Science 6e (paper) Daniel D. Chiras,2013 *Eschatology and Ecology* Paul Hang-Sik Cho,2011-05-01 This book raises the question of why Korean people and Korean Protestant Christians in particular pay so little attention in theory or practice to ecological issues The author argues that there is an important connection or elective affinity between this lack of attention and the otherworldly eschatology that is so dominant within Korean Protestant Christianity Dispensational premillennialism originally imported by American missionaries resonated with traditional religious beliefs in Korea and soon came to dominate much of Korean Protestantism This book argues that this of all forms of millennialism is the most damaging to ecological concerns It also suggests how Korean churches may effectively respond to the ecological challenge

Climate Change Liability and Beyond Jiunn-rong Yeh, Sandrine Maljean-Dubois, Yann Kerbrat, 2017-01-18

Climate change and its adverse impacts on nature and human society are clearly felt. Who should bear the responsibility? Should anyone be held liable for grave losses and damages related to climate change? In what way and to what extent can these issues be addressed in legal mechanisms both globally and locally? Will an international liability regime be an ultimate solution? Are courts ready for and capable of resolving these disputes that find intricacy of law, policy, and science? To shed light on these issues, this book is structured with four main themes on the discussions of climate change liability and related mechanisms: 1. state liability and responsibility, 2. climate change litigation, 3. climate change liability and alternatives, and 4. dispute resolution and remedies. Reflections on the concepts of liability, responsibility, and accountability have provided nuanced understandings of their functional dynamics in climate change governance. Our findings also suggest that international and domestic courts have become a vital player in attribution or distribution of climate change liability. In addition to formalistic rights discourse and rigid liability regime, a few alternatives such as carbon market, insurance, mediation, or soft law are also finding their ways to ensuring sustainability of climate change governance.
