World Cyndy Baskin, Norma Jean Profitt, 2019-11-20 *Spirituality and Social Justice* explores how critically informed spirituality can serve as an inspiration and a political force in the quest for social and ecological justice. Writing from various spiritual and religious worldviews including Indigenous, Islamic, Wicca, Witchcraft, Jewish, Buddhist, and Christian, the authors, practitioners, and academics of social work draw on lived experience, research, and literature to illuminate how relationships with spirit can orient ways of being and acting to build a more just society. In Part One, the authors foreground Indigenous spirituality as resistance and decolonization. Part Two examines the complex ethical and political dimensions of spirituality, including the ecological destruction of the Earth and the influence of contemporary neoliberalism. Lastly, Part Three explores spirituality in teaching and learning contexts, both inside and beyond the classroom. Engaging and well-written, *Spirituality and Social Justice* challenges the notion that practitioners must put aside their critical spirituality in teaching, learning, healing, and practice. Students, practitioners, and academics of social work and other helping professions will benefit from the unique insights into spirituality and religion and how they inform social justice activism. *Promoting Health and Well-being in Social Work Education* Beth R. Crisp, Liz Beddoe, 2013-10-18 Social work educators can play an important part in ensuring that the promotion of health and well-being is firmly on the social work agenda for service users as well as for students and educators. Nevertheless, this has not been a priority within social work education and presents a challenge which requires some rethinking in terms of curriculum, content, pedagogy, and how social workers respond to social problems. Furthermore, if the promotion of health and well-being is not considered a priority for social workers, this raises important questions about the role and relevance of social work in health and thus poses challenges to social work education both now and in the future. This book contains contributions from social work educators from Australia, America, Canada, New Zealand, and the UK. They reflect on how best to prepare students to put health and well-being to the forefront of practice, drawing on research on quality of life, subjective well-being, student well-being, community participation, and social connectedness, religion, and spirituality, mindful practices, trauma, and health inequalities. This book is an extended version of a special issue of *Social Work Education*. *The Ecosocial Transition of Societies* Aila-Leena Matthies, Kati Närhi, 2016-10-04 This groundbreaking book both explains and expands the growing debate on ecological environmental social work at the global level. In order to achieve this, the book strengthens the environmental paradigm in social work and social policy by undertaking further research on theoretical and conceptual clarification as well as distinct reflections on its practical directions. Divided into five parts, concepts, the impact of environmental crises, sustainable communities and lifestyles, food politics, and the profession in transition, this work's main objective is to place ecological social work as a part of the more comprehensive and interdisciplinary eco-social transition of societies towards sustainability, balancing economic and social development with the limited resources of the natural environment. By focussing on these five core concepts, it shows how social work and social policy contribute to this transition through having a research-based approach and orientation on solutions rather than

problem analysis The book will be of interest to scholars from a broad range of disciplines including those in social work and social policy sustainability economics agriculture and environmental studies Human Behavior and the Social Environment, Macro Level Katherine S. Van Wormer, Fred H. Besthorn, Thomas Keefe, 2007 Each person is a unique individual yet we all are also defined by groups those we belong to and those we are excluded from voluntarily or involuntarily In the second half of the Human Behavior and the Social Environment sequence Katherine van Wormer Fred Besthorn and Thomas Keefe take a stimulating new approach to exploring this macro view of humanity and demonstrating how each component of society from the single person to the sprawling organization is part of a dynamic whole Their collaboration has produced a remarkable volume that will help students recognize and consider interactions between and among individuals and social systems and thereby develop into truly effective social workers Outlines theoretical concepts and practice implications in each chapter Highlights the importance of the natural environment and ecology the community of the earth to human and group behavior Sets forth a refined understanding of the role of spirituality the community of faith in people's lives Focuses on evidence based theory and research Teaches from a global cross cultural perspective highlighting themes of empowerment and social justice Features dynamic readings and personal narratives that highlight each chapter's topic Accompanied by an online instructor's manual with Power Points for lecture presentations chapter summaries key terms suggested classroom activities and a test bank with essay and multiple choice questions Also available is a companion volume Human Behavior and the Social Environment Micro Level which offers an eye opening view of how biological psychological and cultural forces influence individuals behavior Interdisciplinary Perspectives on Planetary Well-Being Merja Elo, Jonne Hytönen, Sanna Karkulehto, Teea Kortetmäki, Janne S. Kotiaho, Mikael Puurtinen, Miikka Salo, 2023-06-26 This book proposes a paradigm shift in how human and nonhuman well being are perceived and approached In response to years of accelerated decline in the health of ecosystems and their inhabitants this edited collection presents planetary well being as a new cross disciplinary concept to foster global transformation towards a more equal and inclusive framing of well being Throughout this edited volume researchers across the humanities social sciences and natural sciences apply and reflect on the concept of planetary well being showcasing its value as an interdisciplinary cross sectoral changemaker The book explores the significance of planetary well being as a theoretical and empirical concept in sustainability science and applies it to discipline specific cases including business education psychology culture and development Interdisciplinary perspectives on topical global questions and processes underpin each chapter from soil processes and ecosystem health to global inequalities and cultural transformation in the framework of planetary well being The book will appeal to academics researchers and students in a broad range of disciplines including sustainability science sustainable development natural resources and environmental humanities Calling readers to assess challenge and rethink the dominant perceptions of well being and societal activities this rich resource that explores the interconnection between
