The Economic History of England Ephraim Lipson, 1956 **Chapters from The Agrarian History of England and Wales: Volume 3, Agricultural Change: Policy and Practice, 1500-1750** Joan Thirsk, 1990 Material from The Agrarian History of England and Wales in paperback with new introductions **Large Databases in Economic History** Mark Casson, Nigar Hashimzade, 2013-11-20 Big data is now readily available to economic historians thanks to the digitisation of primary sources collaborative research linking different data sets and the publication of databases on the internet Key economic indicators such as the consumer price index can be tracked over long periods and qualitative information such as land use can be converted to a quantitative form In order to fully exploit these innovations it is necessary to use sophisticated statistical techniques to reveal the patterns hidden in datasets and this book shows how this can be done A distinguished group of economic historians have teamed up with younger researchers to pilot the application of new techniques to big data Topics addressed in this volume include prices and the standard of living money supply credit markets land values and land use transport technological innovation and business networks The research spans the medieval early modern and modern periods Research methods include simultaneous equation systems stochastic trends and discrete choice modelling This book is essential reading for doctoral and post doctoral researchers in business economic and social history The case studies will also appeal to historical geographers and applied econometricians **The Rise and Fall of Modern Empires, Volume III**

Sarah Stockwell, 2017-03-02 Few aspects of the history of modern empires are of such significance as their economics and politics These factors are inextricably linked in many analyses have generated extensive historiographical debate and are currently the subject of some of the freshest and liveliest scholarship The articles and chapters which are brought together in this volume relate not only to the European colonial empires but also to the Napoleonic Russian and Japanese empires The

collection is strongly comparative in approach with the articles arranged into thematic sections on the place of politics and economics in the rise and fall of modern empires the causal relationship between modern empires and colonial global and metropolitan economic transformations and the technologies of rule which provided the frameworks through which colonial economies were managed and rights defined The collection reflects new approaches as well as the continuing importance of issues addressed in an older historiography and the thematic arrangement produces useful juxtapositions of older and newer literatures The substantial introduction explores the themes and identifies key historiographical trends in relation to each
