concentrated discussions of topical trade issues the International Institute for Applied Systems Analysis IIASA organized an international conference on International Trade and Restructuring in Eastern Europe which took place in Laxenburg Austria on 19 and 21 November 1992 The Austrian National Bank joined IIASA to co sponsor the event Participants of the conference were experts of international economics and trade policy from East and West policy makers and representatives of international organizations like the IMF the Commission of the European Communities the OECD and the European Bank for Reconstruction and Development EBRD The papers prepared for the event and the lively discussions during the conference itself prove that the topics are intellectually challenging and timely for policy makers It has widely been recognized that international economic relations play a crucial role in the transition of countries of Central and Eastern Europe The scope speed and success of the efforts to transform the formerly centrally planned economies to market economies have increasingly become dependent on the pattern these countries have in their relation to the rest of the world Transition comprises three major processes macro stabilization marketization and restructuring The success of these three hinges to a large extent on the response of these economies to the new conditions set by international trade and exchange regimes

**European Economic Integration as a Challenge to Industry and Government** Richard Tilly, Paul J.J. Welfens, 2013-12-14 explicit presentation of some of those stylized facts in the form of a brief chronologically structured narrative In keeping with the broad scope of this volume we begin by going back at least two hundred years to the growth of an integrated national capital market in England in the 18th century see Neal Chapter This starting point has the advantage of calling attention to a number of important points First the form of integration by which a central market London for a standardized good government bonds or consols came to serve as linkage between two or more hitherto

separate regional markets represents a typical and important form of financial and economic integration. In Kindleberger's terminology it is the integration via third parties form where say security prices in A and B converge  $2 \frac{A+C}{B}$  instead of  $\frac{A+B}{2}$ . In the 18th century English context this central market provided a widely available index of the opportunity costs of alternative investments the importance of which should not be underestimated for it contributed to national economic integration in England (NEAL 1994). Second this example illustrates an important point of political economy. The prerequisite for the development of the central market mentioned was the establishment of sound public finances based on the state's widely accepted power to tax.
