Economic Models Of Agricultural Land Conservation And Environmental Improvement:

Tools for Land Use Analysis on Different Scales Bas Bouman, 2013-12-19 This book reflects the results of more than ten years of cooperative research involving Wageningen Agricultural University y l AU in the Netherlands the Tropical Agricultural Research and Higher Education Center CATIE Centro Agronómico Tropical de Investigación y Enseñanza in Costa Rica and the Costa Rican Ministry of Agriculture and Livestock MAG Ministerio de Agricultura y Ganadería as part of the Research Program on Sustainability in Agriculture REPOSA in the Central American country The type of cooperation was unusual as it focused on both research and the education of students undertaking either M Sc thesis projects or a program of practical training in the various aspects of studying land use Since funding was provided by W AU a high degree of scientific autonomy was created that has clearly benefited the independent scientific rigor of the work Over the ten year period the program has changed from being a patchwork of various insulated specialist projects into a truly interdisciplinary effort leading to the development of innovative tools for analyzing land use on a number of geographical scales These tools are presented in this book Besides CATIE and MAG cooperation with other Costa Rican partner institutions has been essential from the beginning and this process of interaction has also evolved considerably over time

Farming Action: Catchment Reaction J Williams, RA Hook, HL Gascoigne, 1998-01-01 Dryland farming is a major export earner for many temperate zone countries yet it continues to degrade a country's natural resources Effects are not restricted to the land changes in water quality can reduce the potential uses of water and bring about catastrophic changes in both freshwater and coastal ecosystems Farming Action Catchment Reaction provides a comprehensive technical overview of the relationships between dryland farming systems and catchment land and water quality in Australia and integrates it in a whole system framework It deals with the issues in terms of people pointers processes and prediction as it discusses social aspects of developing and implementing research to improve dryland farming systems in catchment management programs indicators of catchment health and the processes which determine the impact of the farming action on the catchment response It concludes by considering the adequacy of our ability to use this process knowledge in models to predict the effect of dryland farming on catchment condition

Economics of Sustainable Agriculture Koichi Kuriyama, 2025-03-28 Fertilizers are indispensable for agricultural production Chemical fertilizers have significantly improved agricultural productivity However the excessive use of fertilizers has caused serious nitrogen pollution What is the reason of a lack of progress in addressing nitrogen pollution What is necessary to achieve

sustainable nitrogen use in agriculture This book provides a new perspective from an economic standpoint on these questions Firstly we propose the non market valuation methods to evaluate the social costs of nitrogen Because nitrogen control requires considerable effort and cost evaluating the costs and benefits of nitrogen measures in monetary terms allows for a comparison of the expenses and benefits of nitrogen control despite the delays in implementing such measures in the agricultural sector Secondly we analyze the behavioral changes of producers and consumers regarding nitrogen to indicate the direction of agricultural environmental policies for sustainable nitrogen use in the future To achieve sustainable nitrogen use farmers and consumers need to adopt production and consumption behaviors that consider nitrogen By analyzing the effects of visualizing the nitrogen footprint on the behavioral changes of farmers and consumers this book not only highlights the limitations of conventional agricultural policies but also provides recommendations for future agricultural environmental policies

The Economics of Soil Conservation Technologies on Small Farms in Central Honduras Thad Eldon Wengert,1997 **Advances in Agronomy** ,1994-11-07 Advances in Agronomy increased its publication frequency to three volumes per year in 1993 and will continue this trend as advances in the field dictate Volume 53 contains four excellent reviews which cover an international spectrum of advances in the crop and soil sciences One of the most important areas of research sustainable agriculture is treated in a comprehensive article in crop rotation in the twenty first century Aluminum in acid soils and the factors controlling its behavior are detailed in a second article A third long review explains the role of nutrient management on water quality which is now a critical issue for environmental conservation The final chapter is a definitive treatise on interparticle force effects on physical behavior of soils which has crucial influences on plant growth and yield Sustainable agriculture Acid soils Water quality and conservation Soil physics , *Tackling Sustainable Development in Africa and Asia* Shogo Kudo,Farai Kapfudzaruwa,2018-10-18 This book provides a platform for young scholars in Africa and Asia the Next Generation Researchers NGRs to publish their research outputs and express their perspectives on varying sustainable development challenges This book forms part of a book series for the Education for Sustainable Development in Africa ESDA initiative administered by the United Nations University Institute for the Advanced Study for Sustainability UNU IAS in partnership with 8 leading African universities The sustainability perspectives expressed by young people previously a silent voice in the global sustainable development agenda are valuable in informing policy debates particularly in developing countries Furthermore the multidisciplinary perspectives presented in this book will be utilised to inform instructional material for ESDA s three Master s programmes in Sustainable Urban Development SUD Sustainable Integrated Rural Development in Africa SIRDA and Mining and Mineral Resources MMR as well as policy input to key developmental issues in Africa Current Issues in the Economics of Water Resource Management P. Pashardes,T.M. Swanson,A. Xepapadeas,2013-04-17 The marginal price elasticities estimated by Martinez Espineira conforms to expectation The price specification that accounts for the changing proportion of water users in each block yields a higher elasticity 0.47

compared to the specification ignoring this feature of the data. However, this difference is not found to be statistically significant, a result attributed to the low power of the test, small sample size limiting the accuracy of estimates. In conclusion, the paper provides a theoretically correct price specification for demand functions under block pricing and aggregate data. The empirical findings in the paper, however, are not conclusive, and further empirical work using more data and alternative nonlinear demand functions is needed to show the practical implications of the arguments put forward by the Martinez Espineira's paper. Static empirical consumer demand functions estimated with aggregate data are well known to suffer from serial correlation and other statistical problems associated with misspecified dynamics. These dynamics arise because consumers do not react immediately to a change in prices due to their largely predetermined lifestyle. In the case of demand for water, for example, current purchases can be largely predetermined due to commitments arising from past purchases such as swimming pools, bathtubs, dishwashing machines, etc. Muellbauer and Pashardes (1992) show that the autoregressive nature of consumer demand data can be captured in a theoretically consistent manner by incorporating intertemporal aspects of consumer behaviour in the model through habit formation and durability. Innovations in Sustainable Agricultural Systems, Agriculture 4.0 and Precision Agriculture, Volume 2 Irina Samoylenko, Toshpulot Rajabov, 2025-09-20. This book delves into the transformative technologies and practices that are shaping the future of agriculture, emphasizing the importance of sustainability. Key themes explored in the book include: I. Digital Agricultural Techniques, Tools, and Systems, which highlight the role of data analytics and automation in optimizing farm operations; II. Sustainable Development of Agricultural and Food Production, focusing on regenerative practices that promote soil health and enhance food security; III. Economic, Ecological, and Social Systems for Human Development, examining how integrated approaches can enhance rural livelihoods and community resilience; IV. Sustainability in Animal Husbandry and Veterinary Practice, addressing innovations that improve animal welfare while minimizing environmental impacts. This book serves as an invaluable resource for researchers, farmers, policymakers, and students, providing a multidisciplinary perspective on how innovative agricultural practices can lead to a sustainable and resilient food system.

Demands On Rural Lands Chris Cocklin, 2019-04-09. Planning for the use of rural lands in the developed countries of the world has become an increasingly contentious process as resources become more limited and conflicting needs grow stronger. The critical questions are: Which is more important, agriculture or livestock

production recreation industry or urban housing and Who decides priorities and responsibilities for use The capacity of the land to meet all of the demands placed upon it without serious environmental disruption has become a major concern for all Recognizing the exigencies of the situation the contributors define and evaluate the theoretical and methodological frameworks within which rural land use problems can be analyzed In the discussions focus on the identification and characterization of resources and competing users of rural lands stressing that a careful articulation of the problem is essential to effective planning is aimed at developing appropriate information bases useful in planning for the problems related to the management of these rural lands The discussion of policy options for rural resource use in builds upon the material in the previous two sections to provide a framework for an analysis of rural resource use
