Inferring bank-to-bank competition from dynamic time series analysis of price correlations Eduardo Ribeiro, Kamaiaji Castor, 2022-01-29 Inferring bank to bank rivalry and competition generally requires the estimation of a full demand model with high data requirements unavailable to most researchers We

suggest dynamic time series analysis of price correlations to infer about bank to bank competition taking into account the well known criticisms to price correlations for delimiting relevant markets The method is applied for credit markets in Brazil where bank monthly loan interest rates time series are available We conclude that there is little rivalry between large banks in most of the credit markets studied

Modern Time Series Analysis in Forest Products Markets Jens Abildtrup, F. Helles, Per Holten-Andersen, Jakob Fromholt Larsen, Bo Jellesmark Thorsen, 2012-12-06 This volume comprises fifteen papers exploring the consequences of applying modern time series methods particularly co integrated time series methods for the analysis of forest economics problems The methods represent the forefront of econometrics in this area and the volume is the first of its kind An introductory paper explains the econometrics of unit root processes Much of what follows in the other papers depends upon only a few of the ideas presented in the introduction The volume includes tests of e g the Law of One Price land valuation models demand and supply models Granger causality and forecast models The reader will learn a great deal about forest economies particularly in Northern Europe and about the practical use of modern time series methods The methods presented are applicable to other fields of economics The volume is aimed at researchers in applied economics and as a supplement to advanced theoretical textbooks mainly in Natural Resource Economics
