liner shipping rather stepmotherly besides the work of Bennathan and Walters 1969 a relatively small group of specialized maritime economists including A Stromme Svendsen T Thorburn S Sturme R Goss and B M Deakin have in the post war period made important contributions to the subject but so far no coherent and reasonably comprehensive treatise of liner shipping economics has appeared The first purpose of the present volume is therefore obvious to provide just that The book is divided in three parts Part I The liner shipping industry Part II Liner service optimization Part III Economic evaluation of the conference system Needless to say all three parts concur to fulfill the first purpose of providing a complete book of liner shipping economics In Part II a more or less separate second purpose has been to develop analytical tools for liner service optimization Thereby we use different approaches
