Postmodernization Ronald Inglehart, 2020-06-30 Ronald Inglehart argues that economic development cultural change and political change go together in coherent and even to some extent predictable patterns This is a controversial claim It implies that some trajectories of socioeconomic change are more likely than others and consequently that certain changes are foreseeable Once a society has embarked on industrialization for example a whole syndrome of related changes from mass mobilization to diminishing differences in gender roles is likely to appear These changes in worldviews seem to reflect changes in the economic and political environment but they take place with a generational time lag and have considerable autonomy and momentum of their own But industrialization is not the end of history Advanced industrial society leads to a

basic shift in values de emphasizing the instrumental rationality that characterized industrial society Postmodern values then bring new societal changes including democratic political institutions and the decline of state socialist regimes To demonstrate the powerful links between belief systems and political and socioeconomic variables this book draws on a unique database the World Values Surveys This database covers a broader range than ever before available for looking at the impact of mass publics on political and social life It provides information from societies representing 70 percent of the world s population from societies with per capita incomes as low as 300 per year to those with per capita incomes one hundred times greater and from long established democracies with market economies to authoritarian states Modernization Science Chuanqi He,2012-02-17 Depending on their national level of income development and modernization all countries in the world can be generally categorized as either advanced or developing Studies on why advanced countries continue to develop how they maintain their level of development and how developing countries enter into the advanced club fall into the field of modernization science which is an emerging interdisciplinary science This monograph the first English book available on modernization science interprets its concepts methodologies general theories first and second modernization six level specific six field specific and three sector specific modernizations modernization policy and evaluation and the principles and methods of national development since the 18th century It provides clear systematic up to date information on this new discipline with more than 173 figures and 265 tables and covers 131 countries and 97% of the global population A comprehensive outlook on world modernization is presented from a Chinese perspective Economics and Capitalism in the Ottoman Empire Deniz T. Kiliçoğlu,2015-06-19 Is it possible to generate capitalist spirit in a society where cultural economic and political conditions did not unfold into an industrial revolution and consequently into an advanced industrial capitalist formation This is exactly what some prominent public intellectuals in the late Ottoman Empire tried to achieve as a developmental strategy long before Max Weber defined the notion of capitalist spirit as the main motive behind the development of capitalism This book demonstrates how and why Ottoman reformists adapted English and French economic theory to the Ottoman institutional setting and popularized it to cultivate bourgeois values in the public sphere as a developmental strategy It also reveals the imminent results of these efforts by presenting examples of how bourgeois values permeated into all spheres of socio cultural life from family life to literature in the late Ottoman Empire The text examines how the interplay between Western European economic theories and the traditional Muslim economic cultural setting paved the way for a new synthesis of a Muslim capitalist value system shedding light on the emergence of capitalism as a cultural and an economic system and the social transformation it created in a non Western and more specifically in the Muslim Middle Eastern institutional setting This book will be of great interest to scholars of modern Middle Eastern history economic history and the history of economic thought *The Economics of Industrial Modernization* Cristiano Antonelli,Pascal Petit,Gabriel Tahar,1992 This text is designed to briefly introduce and synthesize various theories of innovation and
