Effective School Leadership Responding To Change:

Effective School Leadership John MacBeath, 1998-11-19 *Effective School Leadership* raises many questions about effective leadership and how it is seen from different viewpoints The issues are placed in political context and in relation to a changing world scene *Effective Educational Leadership* Nigel Bennett, Megan Crawford, Marion Cartwright, 2008-03-25 Keith Grint's persuasive essay on the art of leadership in *Effective Educational Leadership* is uncannily accurate Tim Brighouse *Times Educational Supplement* its unique contribution is the exploration of links between leadership discourses and the themes that have emerged from the school effectiveness movements since the 1980s Riley and MacBeath provide one of the most valuable contributions to the volume by arguing that there are no generic recipes for educational leadership but ingredients which need to be carefully selected with a knowledge of specific contexts and needs I would use this book with graduate students and practitioners seeking to develop a perspective about contemporary educational leadership Its greatest contribution is its exploration of the links between effective leadership and effective education The book also provides optimism in that many of the authors have not capitulated to the reductionist visions of the past two decades There is still hope that educational theorists and practitioners view the life world as the true source of educational inspiration *Journal of Educational Administration Leadership* is the theme of this decade This series provides an enormously valuable overview of all the critical issues involved in designing leadership as the main strategy for educational reform A great and timely collection Michael Fullan Dean OISE University of Toronto This book makes an excellent contribution to the current debate on Educational Leadership It blends theory with practice and as such provides an important resource for many aspects of leadership development programmes at a variety of levels Its ability to draw upon international perspectives along with examples beyond conventional educational parameters enhances its quality The book contains a well documented account of how leadership has been studied which will appeal both to the academic reader and to the professional provider of CPD in leadership offering a wealth of information that can be practically adopted and adapted for a range of courses Stephen Merrill *Journal of Inservice Education* Educational management and administration studies focus on leadership as a key determinant of effective educational institutions and currently much leadership preparation is characterized by a rational skills focused approach Placing current thinking in leadership studies in its organizational and historical context this book explores its implications for leadership preparation leadership theory in action and examines some of the dilemmas and tensions facing educational leaders in practice It draws on literature and research from both the private and public sectors It is deliberately international in its content and focus and examines a range of practice both within and outside education Each chapter has a short introduction by the editors setting it in context This book is for providers and students in higher educational institutions for postgraduate level courses in educational management and for leadership development provision for Headteachers induction programmes NPQH and LPSH It is also suitable for short courses and for practitioners occupying

or aspiring to leadership roles in schools colleges and other educational organizations Effective Leadership for School Improvement Alma Harris, Christopher Day, David Hopkins, Mark Hadfield, Andy Hargreaves, Christopher Chapman, 2013-09-05

In a complex and multi layered world the conventional idea of great leadership being the result of the efforts of a single individual is rapidly becoming redundant This book takes up the challenge of finding an alternative method of leadership in educational contexts and looks at how this can help achieve sustained improvement in schools The authors acknowledge that there are no simple solutions to school improvement They argue that the effective leaders of the future will be those who are able to share responsibility build positive relationships and offer stakeholders teachers parents and students an opportunity to work together to improve their schools The book is based around four key areas of concern the changing context of leadership leadership and school improvement building leadership capacity and future direction and implications In each section the authors discuss current theories and issues and put forward alternative ideas and perspectives This important book will make valuable reading for headteachers principles deputies and other senior teachers particularly those undertaking leadership qualifications and training It will also be of interest to postgraduate students and school governors
