and life sciences This book examines the computerization of TCM information and knowledge to provide intelligent resources and supporting evidences for clinical decision making drug discovery and education Recent research results from the Traditional Chinese Medicine Informatics Group of Zhejiang University are presented gathering in one resource systematic approaches for massive data processing in TCM These include the utilization of modern Semantic Web and data mining methods for more advanced data integration data analysis and integrative knowledge discovery This book will appeal to medical professionals life sciences students computer scientists and those interested in integrative complementary and alternative medicine Interdisciplinary book bringing together Traditional Chinese Medicine and computer scientists Introduces novel network technologies to Traditional Chinese Medicine informatics Provides theory and practical examples and case studies of new techniques Computer Methods and Advances in Geomechanics Chandra S. Quality control for efficacy and safety of herbal medicinal products Jian-bo Yang,Zhichao Xu,Wei Cai,Yong Li,Wing Lam,2023-06-27 *Advances in Information and Communication* Kohei Arai,2021-04-15 This book aims to provide an international forum for scholarly researchers practitioners and academic communities to explore the role of information and communication technologies and its applications in technical and scholarly development The conference attracted a total of 464 submissions of which 152 submissions including 4 poster papers have been selected after a double blind review process Academic pioneering researchers scientists industrial engineers and students will find this series useful to gain insight into the current research and next generation information science and communication technologies This book discusses the aspects of communication data science ambient intelligence networking computing security and Internet of things from classical to intelligent scope The authors hope that readers find the volume interesting and valuable it gathers chapters addressing state of the art intelligent methods and techniques for solving real world problems along with a vision of the future research **Nuclear Science Abstracts** ,1974-11 **Genome Editing and Biological Weapons** Katherine Paris,2022-12-15 This monograph introduces current genome editing technologies clustered regularly interspaced short palindromic repeat CRISPR CRISPR associated Cas systems transcription activator like effector nucleases TALENs and zinc finger nucleases ZFNs and provides an assessment of the risk of misuse of these technologies based on the following parameters accessibility ease of misuse magnitude of potential harm and imminence of potential misuse The findings from this assessment are applied to analyze and evaluate the threat posed by the intentional misuse of genome editing technologies to develop biological weapons Furthermore the book discusses the implications of misuse for different applications of genome editing such as making existing pathogens more dangerous modifying the human microbiome weaponizing gene drives engineering super soldiers and augmenting the general population to confer economic advantages Technologies that enable genome editing with programmable nucleases including CRISPR TALEN and ZFN allow for the precise genetic modification of organisms and cultured cells While these technologies are used for a variety of beneficial

applications intelligence and defense experts have raised concerns that genome editing technologies especially CRISPR could be misused to develop new and improved biological weapons Furthermore experts worry that the number and type of actors who could potentially misuse genome editing is dramatically increasing given the democratization of biology which is allowing biology to become more accessible to everyone including nonexperts The book provides a comprehensive assessment of how feasible it is for users with different levels of knowledge and skill to acquire and then to apply the technologies to develop a biological weapon It also provides an assessment of governability and a tailored set of recommendations that address security concerns These recommendations are sensitive to the cost benefit trade off of regulating genome editing technologies The book targets researchers as well as intelligence analysts defense and security personnel and policymakers **Scientific and Technical Aerospace Reports** ,1994 *Office of Education Research Reports, 1956-65, ED 002 747-ED 003 960* Educational Research Information Center (U.S.),1967
