and transport models are applied Concise documentation is provided on each of the models The practicability of applying the chain of models was tested by applying it in four case study cities in Australia Germany Slovenia and the United Kingdom that have diverse conditions in terms of hydrogeologic setup climate and data availability This permitted additional validation by field investigations including problem oriented monitoring campaigns aimed at assessing the impact of wastewater practice on groundwater The book provides guidance and examples of the application of multilevel piezometers on adapted monitoring strategies and the use for interpretation purposes of microbiological parameters pharmaceutical residues and related marker species The socio economic analysis in the case study cities sometimes uncovered distinctively different problem perceptions and priorities both in the groups of experts responsible for the water management and with the remaining stakeholders The AISUWRS project has developed tools to foster these urgently required deliberation processes Methodologies for formal sustainability assessment with a triple bottom line background were also elaborated and tested during the case studies The case studies have shown that the approach is valid and constitutes an important step towards integrated urban water management
