**Private Regulation of Labor Standards in Global Supply Chains** Sarosh Kuruvilla,2021-04-15 Private Regulation of Labor Standards in Global Supply Chains examines the effectiveness of corporate social responsibility on improving labor standards in global supply chains Sarosh Kuruvilla charts the development and effectiveness of corporate codes of conduct to ameliorate sweatshop conditions in global supply chains This form of private voluntary regulation spearheaded by Nike and Reebok became necessary given the inability of third world countries to enforce their own laws and the absence of a global regulatory system for labor standards Although private regulation programs have been adopted by other companies in many

different industries we know relatively little regarding the effectiveness of these programs because companies don't disclose information about their efforts and outcomes in regulating labor conditions in their supply chains *Private Regulation of Labor Standards in Global Supply Chains* presents data from companies, multi-stakeholder institutions and auditing firms in a comprehensive investigative dive into the world of private voluntary regulation of labor conditions. The picture he paints is wholistic and raw but it considers several ways in which this private voluntary system can be improved to improve the lives of workers in global supply chains. *National Nanotechnology Initiative* United States. **Responses to Environmental Challenges** Ann Rappaport, Margaret Fresher Flaherty, 1992-06-23 Environmental concerns are on the corporate agenda and companies are searching for effective managerial strategies. Multinational corporations command huge financial resources and technical skills and their actions toward the environment can have a profound impact. Drawing detailed examples from major multinational companies, this book provides a wealth of practical insight on how companies approach the difficult task of responding to an increasing variety of environmental challenges. The authors identify several specific programs being developed and implemented by corporations to establish accountability for environment health and safety and to integrate environmental concerns throughout the corporate decision making process. The material in this work is drawn from extensive interviews conducted in U.S.-based companies and examinations of production facilities in developed and developing countries. In addition, results of a survey on corporate environment health and safety practices are woven into the analysis. Although they note that there are inadequacies in some corporate responses to environmental challenges, the authors contend that improved practice will result from actions on the part of government and universities as well as companies themselves. This book will help decision makers review their environmental programs and develop sound strategies to overcome the corporate environmental anxiety that "We know we're out of compliance somewhere in the world all of the time." Northern Ireland's Waste Management Strategy Northern Ireland Audit Office, 2005-06-23 Northern Ireland's total waste generation is estimated at 20 million tonnes per year. This report reviews the action being taken by the Department of the Environment and the Environment and Heritage Service to tackle Northern Ireland's waste problem. It examines the degree to which the legislative framework has kept pace with EU requirements, the comprehensiveness of the waste management strategy, the extent to which the strategy has been implemented and the progress to date.

Halting Biodiversity Loss Great Britain. Parliament. House of Commons. Environmental Audit Committee,2008 This is the thirteenth report from the Environmental Audit Committee of the 2007 08 session HCP 743 ISBN 9780215524843 The Committee states that the Government will fail to meet the 2010 target to halt biodiversity loss although the target might have been unrealistic The Committee does see some progress with 80% of Sites of Special Scientific Interest SSIs in a favourable condition with a number of rare species having recovered In general though biodiversity loss continues in the wider countryside with many species and habitats facing severe declines and local extinctions The Committee does believe though that with leadership and effective policies biodiversity loss could in fact be reversed and states the Government should adopt a new target to halt the loss Biodiversity policies need to be cross departmental and the Government s

ecosystem assessment is a way forward by encouraging such an approach and promoting biodiversity protection at the regional and local scales The Committee further states that the Government could make a large contribution in preventing biodiversity loss through more support for the UK Overseas Territories
