Eight Approaches To Teaching Composition:

Eight Approaches to Teaching Composition Timothy R. Donovan, Ben W. McClelland, 1980 Teaching Composition Gary Tate, 1987 **Theorizing Composition** Mary Kennedy, 1998-06-25 The last 25 years have witnessed extraordinary growth in the academic specialization variously described as composition studies or rhetoric and composition What was noticeable about the field in its infancy was a preoccupation with practice a lack of emphasis on theory and an exclusive reliance on the writing process As its disciplinary status has grown the field has become far more theoretical Composition studies has expanded its focus reconceptualized the writing process and embraced a wide range of critical perspectives The result of this change is that terms such as poststructuralism social construction gender and genre which were largely unknown in 1965 now dominate discussion This reference book is a guide to the multiplicity of theories that have emerged to form the disciplinary foundation of composition studies The volume consists of 66 entries each of which is written by an expert contributor and focuses on a particular theory or group of theories While the entries show how various individuals have contributed to theoretical movements very few concentrate on the work of a single theorist Each entry first provides a critical summary of a particular theory or group of theories including key elements basic concepts and claims and information about seminal or particularly influential works It then reviews the theory's critical reception in composition studies and discusses its significance in the field The bibliography at the end of each entry lists primary texts and major scholarship related to the theory and provides additional suggestions for further reading The volume closes with a selected bibliography of important works **Advances in Computer Assisted Learning** P. R. Smith, 2014-05-23 *Advances in Computer Assisted Learning* contains selected proceedings from the CAL Symposium on Computer Assisted Learning held at the University of Nottingham in the UK in 1985 This book reviews advances in computer assisted learning in the areas of curriculum development visually handicapped and disabled students project work in schools television viewdata and video applications database applications and engineering education and training This monograph has 35 chapters and opens with a discussion on the computing aspects of interactive video focusing on the design and production of the software used to control the videodisc developed by the Open University in the UK The next chapter illustrates a variety of case studies whereby local viewdata has been exploited by both teachers and their pupils in different parts of Europe Attention then turns to the use of computer assisted communication in the education of the visually impaired the use of microcomputers in teaching electronics and theoretical considerations in selecting software for language arts This text will be of interest to educators and policymakers who want to implement computer technology in the classroom **A Guide to Composition Pedagogies** Gary Tate, Amy Rupiper-Taggart, Kurt Schick, Brooke Hessler, 2014-02 This is a bibliographic guide written for newcomers to the field The book familiarizes writing instructors with the current topography of composition studies and directs them to the best books and articles for further exploration **Beyond the Corporate University** Henry A.

Giroux, Kostas Myrsiades, 2001 Prominent scholars in this book move boldly beyond critique to show how and why the critical functions of a democratically informed civic education not merely professional training must become the core of the university's mission. They show why higher education must address what it means to relate knowledge to public life and social responsibility to the demands of critical citizenship. Moreover, they show why democratic forms of education and various elements of a critical pedagogy are vital not only to individual students but also to our economy and our democratic institutions and future leadership. First-Year Composition Deborah Coxwell-Teague, Ronald F. Lunsford, 2014-05-01 First Year Composition: From Theory to Practice's combination of theory and practice provides readers an opportunity to hear twelve of the leading theorists in composition studies answer in their own voices the key question of what it is they hope to accomplish in a first year composition course. In addition, these chapters and the accompanying syllabi provide rich insights into the classroom practices of these theorists.

Forum, 1993 [Growing a Soul for Social Change](#) Tonya Huber-Warring, 2008-04-01 For readers new to the field of multicultural education and human relations education, the recency of these publications heralded as seminal may be confusing for certainly the concepts building the field of multicultural education and human relations education have been around much longer. True. But for the first time we found the conceptual framework guiding principles and critical works across disciplines and fields in Smith's encyclopedic organization. Because of the comprehensive nature of Pritchard Smith's knowledge bases, they have been employed as the organizing themes for this volume. I would clarify that I have not burdened authors to study Smith's analysis and then apply it to their works; the categorization is my own. And as is true of any topic, the interpretation and application may be broadly applicable. One of my major goals in founding this series has been to further develop the knowledge bases with voices from those in the trenches, literally and figuratively, and at the chalkface, while proverbial for some parts of the world, chalk remains a teaching staple in many regions of the world. Throughout this volume, authors will explore and research their own discoveries on this journey: narratives of crossing cultures and developing communities, reconceptualizing democracy and reinterpreting traditions, seeking solidarity and sowing the seeds of social justice. Through critical reflection in the shade of these giants, the reader may discover Ming Fang's bamboo tree.

The SAGE Handbook of Rhetorical Studies Andrea A. Lunsford, Kirt H. Wilson, Rosa A. Eberly, 2008-10-29 The SAGE Handbook of Rhetorical Studies surveys the latest advances in rhetorical scholarship, synthesizing theories and practices across major areas of study in the field and pointing the way for future studies. Edited by Andrea A. Lunsford and Associate Editors Kirt H. Wilson and Rosa A. Eberly, the Handbook aims to introduce a new generation of students to rhetorical study and provide a deeply informed and ready resource for scholars currently working in the field. Key Features: Brings together scholars from across the disciplines of Speech Communication, English, and Writing Studies.
