Eero Saarinen Architect Sculptor Visionary:

By Architects Eero Saarinen, Sandra Dachs, 2013 This engaging series showcases the best work from some of the 20th century's finest designers. Each title begins with an introductory essay before moving on to analyse through sketches, drawings and photographs of original productions the main designs of the featured architect. Also included is a complete illustrated chronology of their works. **Eero Saarinen** Lawrence W. Cheek, Larry Cheek, Eero Saarinen, 1998

Integrated Buildings Leonard R. Bachman, 2004-01-27 An anatomical study of building systems integration with guidelines for practical applications. Through a systems approach to buildings, *Integrated Buildings: The Systems Basis of Architecture* details the practice of integration to bridge the gap between the design intentions and technical demands of building projects. Analytic methods are introduced that illustrate the value, benefit and application of systems integration as well as guidelines for selecting technical systems in the conceptual, schematic and design development stages of projects. Landmark structures such as Eero Saarinen's John Deere Headquarters, Renzo Piano's Kansai International Airport, Glenn Murcutt's Magney House and Richard Rogers's Lloyd's of London headquarters are presented as part of an extensive collection of case studies organized into seven categories: Laboratories, Offices, Pavilions, Green Architecture, High Tech Architecture, Airport Terminals, Residential Architecture. Advanced material is provided on methods of integration including an overview of integration topics, the systems basis of architecture and the integration potential of various building systems. An expanded case study of Ibsen Nelsen's design for the Pacific Museum of Flight is used to demonstrate case study methods for tracing integration through any work of architecture. Visually enhanced with more than 300 illustrations, diagrams and photographs, *Integrated Buildings: The Systems Basis of Architecture* is a valuable reference guide for architecture and civil engineering students as well as architects, engineers and other professionals in the construction industry. *Mid-Century Modern - Visionary Furniture Design from Vienna* Caroline Wohlgemuth, 2021-12-31 Visionary furniture design from Vienna. In 1938 Vienna lost its best and most creative minds. This rupture was manifested in all of the arts and sciences and its mark is felt to this day, not least in the field of furniture design. With inexhaustible creativity, the Jewish furniture designers who were forced to flee Vienna continued to work while in exile. They taught at the best universities and spread their ideas and vision throughout the entire world. Their creations became classics of twentieth-century furniture design, the epitome of mid-century modern style. This book honors the memory of the exiled designers with a thorough overview of their work. It details their life stories and their visionary designs, which remain as relevant and contemporary as ever and brings to light new aspects of the history of Viennese furniture design. A new history of Viennese furniture design with 27 detailed biographies. Numerous previously unpublished photographs and sketches. Including works by Friedl Dicker Brandeis, Martin Eisler, Josef Frank, Friedrich Kiesler, Richard Neutra, Bruno Pollak, Margarete Schütte-Lihotzky, Franz Singer, Ernst Schwadron, among others. Structures of Our Time Roger Shepherd, 2002 From Fifth Avenue shaping Rockefeller Center, the first AIA honoree

Makers of Modern Architecture, Volume II Martin Filler, 2013-08-20 In the first volume of Makers of Modern Architecture 2007 Martin Filler examined the emergence of that revolutionary new form of building and explored its aesthetic social and spiritual aspirations through illuminating studies of some of its most important practitioners from Louis

Sullivan and Frank Lloyd Wright to in our own time Renzo Piano and Santiago Calatrava Now in Makers of Modern Architecture Volume II Filler continues his investigations into the building art beginning with the historical eclecticism of McKim Mead and White best remembered today for New York City's demolished Pennsylvania Station He surveys the seemingly inexhaustible flow of new books about Wright and Le Corbusier and continues his commentaries on Piano's museum buildings with an essay focused on the new Broad Contemporary Art Museum in Los Angeles There are less well known subjects here too from the Frankfurt urban planner Ernst May to Buckminster Fuller inventor of the geodesic dome Filler judges Edward Durell Stone the architect of the U S embassy in New Delhi the Huntington Hartford Museum in New York City and the Kennedy Center in Washington to have been a middling product of his times however personally interesting he may have been And he looks back at James Stirling who in the 1970s and 1980s was a veritable rock star of the profession responsible for what Filler considers some of the very few worthwhile postmodernist buildings The essays collected here are not entirely historical however Filler also focuses on some of the most recent projects to have attracted critical and popular attention both in the United States and abroad including Rem Koolhaas's CCTV building in Beijing and Bernard Tschumi's Acropolis Museum in Athens He argues that Kazuyo Sejima and Ryue Nishizawa's New Museum in New York City is one of those rare clarifying works of architecture that makes most recent buildings of the same sort look suddenly ridiculous He calls Tod Williams and Billie Tsien's brilliant reimagining of the Barnes Collection in Philadelphia a latter day miracle a virtually unimprovable setting for its art He finds Michael Arad's September 11 Memorial at Ground Zero a sobering disturbing heartbreaking and overwhelming masterpiece And he argues that Diller Scofidio Renfro's Institute of Contemporary Art in Boston and their work revitalizing the High Line and Lincoln Center in New York make them today's shrewdest yet most sympathetic enhancers of the American metropolis Filler remains in these nineteen essays a shrewd observer of the pressures on architects and their projects money politics social expectations even the weight of their own reputations But his focus is always on the buildings themselves on their sincerity and directness on their form and their function on their capacity to bring delight to the human landscape Envisioning Architecture Matilda McQuaid, 2002-06-25

The first in a series of books that will showcase works from The Museum of Modern Art's superlative holdings in the fields of architecture and design this text features a range of drawings by great architects such as Frank Lloyd Wright and Alvar Aalto
