Neuromitos en educación Teresa Hernández, 2015-09-28

Los avances en neurociencia están revolucionando nuestra manera de entender los procesos de aprendizaje ya que hasta ahora no era posible observar qué ocurre en el cerebro mientras alguien aprende. Tal como ha advertido el neurocientífico Manfred Spitzer la neurociencia servía a la educación lo que la biología ha sido a la medicina. Esta obra desmonta doce neuromitos o falsas creencias en educación basadas en los conocimientos científicos de los últimos 20 años y que han sido superadas por recientes hallazgos en neurología.

Tenemos un hemisferio cerebral predominante. A más cantidad de horas en la escuela más se aprende. Utilizamos solo el diez por ciento de nuestro cerebro. Tiene el sueño o algún bienestar en el aprendizaje. Se aprende mejor escuchando a Mozart. Basándose en los últimos descubrimientos científicos los autores de este libro proponen nuevas miradas sobre estas y otras cuestiones con el objetivo de contribuir a la construcción de entornos y más todos educativos más eficaces.

El hombre en busca de su sombra Luis Labrada Rondón, 2023-04-20

Con El Hombre en Busca de su Sombra del Dr Luis Labrada Rondón estamos ante una nueva forma de divulgar la ciencia y de dar a conocer a muchos de los involucrados en ella. Utilizando un lenguaje sencillo y cautivante es imposible que el lector no quede atrapado en las diferentes historias que se narran en este libro. El Dr Labrada ha creado una nueva forma de literatura basada en su capacidad descriptiva y en la profundidad de los temas que trata utilizando recursos literarios procedentes del realismo mágico o de la contundencia de la literatura médica clásica. De forma sutil nos introduce a un mundo agradable y a veces injusto para aquellos que se dedican a la investigación científica. Mientras la ciencia se desarrolla muy pocos científicos se interesan en divulgarla. Es meritorio que personas con alto nivel científico devuelvan a la sociedad lo que en esencia redundar en su beneficio. Ya hombres de la talla científica de Stephan Hawking o Michio Kaku demostraron que temas complejos del cosmos pueden llegar al pueblo a través de libros de divulgación científica. El Dr Luis Labrada se pone a la altura de esos científicos por la contundencia con la que da a conocer muchos aspectos de las ciencias médicas modernas y sus interrelaciones con situaciones cotidianas. Hay temas que nos

sorprenden por la importancia que tienen para mantener vivos los sistemas personales de prevenci n cardiovascular En nombre de la comunidad cient fica internacional en nombre de ese pueblo al que has dedicado m s de 30 a os de tu vida y en nombre de todos tus amigos Te doy las gracias por haber dejado con este maravilloso libro una huella imborrable en nuestros corazones En horabuena doctor Luis Labrada Dr Larry White desde Houston Texas Estados Unidos
