Effects Of Hyper Inflation On Accounting Ratios:

The Effects of Hyper-inflation on Accounting Ratios Geoffrey Whittington, Victoria Saporta, Ajit Singh, 1997-01-01 World Bank Technical Paper No 370 Local land users and officials often have conflicting perceptions of and responses to land degradation issues This causes problems for officials in diagnosing and addressing the issue and is a major constraint on the successful implementation of policies and projects to address land degradation This study looks at the perception and response gap between officials and land users in the diagnosis and remedy of land degradation It also examines the dynamics of the loss of soil fertility and low productivity at the village level The study s findings will help shape investment programs to enhance land productivity in Sub Saharan Africa *The Effects of Hyper-inflation on Accounting Ratios* Geoffrey Whittington, Victoria Saporta, Ajit Singh, 1996

The Effects of Hyper-Inflation on Accounting Ratios Geoffrey Whittington, Hyper inflation can have a severe distortionary effect on the pattern of corporate finance which is apparent from company accounts A simple algorithm based upon the method of inflation accounting applied in Brazil is developed and applied to the accounts of Turkish listed companies for the period 1982 90 The adjusted figures give a more plausible picture of corporate profitability and growth and this suggests that the adjustment method is substantially successful The financing patterns emerging from the adjusted data support the proposition of Singh and Hamid 1992 and Singh 1995 that a the corporate sector in developing countries tends to rely more on external finance than on internal finance for growth and b among the external sources of funds it uses new share issues to a surprisingly high degree Further adjustments to the measurement of the external finance variable for Turkey and other countries also support this proposition This contradicts the quot pecking orderquot hypothesis which suggests that retained profits are the preferred source of finance and also runs contrary to the belief that the capital markets of developing countries are inadequate to support substantial corporate growth by external financing including equity financing **Profitability, Accounting Theory and Methodology** Geoffrey

Whittington, 2007-06-11 An important scholar in the history of accounting Geoffrey Whittington s numerous articles cover a broad spectrum of the field and are both sharply insightful and extremely significant He has made important contributions to the topics of inflation accounting accounting theory and methodology and standard setting and he has conducted a number of valuable empirical studies This remarkable collection pulls together essays and articles and encompasses his work on empirical studies based on company accounts specification of empirical models price change accounting taxation and regulation and regulation of accounting and auditing Accompanied by a new introduction and conclusion this significant volume will be extremely useful for historians of accounting as well as accountancy practitioners and researchers

Quantitative Easing as a Highway to Hyperinflation Imad A. Moosa, 2014 This book addresses the topical issue of whether the current environment in the US and other major countries where quantitative easing is used to boost the economy is conducive to the emergence of hyperinflation This is a controversial and highly debated issue Using both economics and

history the author challenges the view that quantitative easing will not lead to hyperinflation and argues that hyperinflation or at least high inflation is likely to appear eventually The book examines all the propositions put forward for and against the eventuality of hyperinflation in the US using illustrations based on actual and simulated data The analysis leads to the conclusion that the current fiscal position of the US government particularly the levels of external debt and unfunded liabilities will not be rectified without resorting to inflationary financing The book would be useful not only for policy makers and economists but also for non specialist observers

Value and Profit Geoffrey Whittington, 2017-08-03 The measurement methods used in financial accounting affect our perception of the value and performance of businesses by determining the amount of reported profit or loss and the resources of the business Thus measurement affects shareholders and other stakeholders in the business It has even been suggested that the world financial crisis of 2007 2010 was partly due to the mis measurement of financial instruments In this book Geoffrey Whittington provides a unique survey of the theory and practice of measurement in financial accounts It seeks to define and illustrate alternative methods using simple numerical examples and to analyse their theoretical properties Also it summarises extensive empirical evidence and the historical development of ideas and practice It is essential reading for advanced undergraduate and postgraduate students studying financial accounting as well as practitioners and policy makers concerned with accounting standards

Economic Theory, Dynamics and Markets Takashi Negishi, Rama V. What Global Economic Crisis? P. Arestis, M. Baddeley, J. McCombie, 2001-07-11 Economics has become an excessively esoteric discipline Opportunities to bridge the gap between theorizing and policymaking are becoming increasingly limited One issue of great importance to modern policymakers is the relationship between globalization and economic crisis With unprecedented trends towards globalization in part propelled by developments in information technology the repercussions of economic crisis are more profound than ever before particularly for developing countries What Global Economic Crisis bridges the gap between theory and policy by examining the destabilising effects of financial crises on economic growth stability and development It also presents some innovative ideas intended to inform the design of institutions able to foster more effective international policy coordination

The Stock Market and the Financing of Corporate Growth in Africa Charles Amo Yartey,2006-09-01 This paper examines the corporate financing pattern in Ghana In particular it investigates whether Singh s theoretically anomalous findings that developing country firms make considerably more use of external finance and new equity issues than developed country firms to finance asset growth hold in the case of Ghana Replicating Singh s methodology our results show that compared with corporations in advanced countries the average listed Ghanaian firm finances its growth of total assets mainly from short term debt The stock market however is the most important source of long term finance for listed Ghanaian firms Overall the evidence in this paper suggests that the stock market is a surprisingly important source of finance for funding corporate growth and that stock market development in Ghana has been important

Law, Institutions and Malaysian Economic Development Jomo Kwame Sundaram,Sau Ngan Wong,2008 This pioneering volume develops an institutionalist analysis of Malaysias post colonial economy by exploring the political economy of development and particularly the interface between economics and law The various authors show that economic policy initiatives in Malaysia have often been accompanied by corresponding legislative and regulatory reforms intended to create an appropriate legal environment and that economic problems or crises arising from earlier policies have led to major legislative innovations
