System Analysis and Cost-effectiveness United States. Army Materiel Command, 1971 Public Budgeting and Finance, Fourth Edition, Robert T. Golembiewski, 1997-06-09 This incomparable Fourth Edition of a standard reference text has been thoroughly updated and enlarged offering comprehensive coverage of the field in a single source and incorporating entirely new as well as time tested material The Revolt Against the Masses Aaron Wildavsky, 2018-04-24 The author of this stunning set of essays on politics and public policy makes crystal clear the meaning of the title The revolutionaries of contemporary America do not seek to redistribute privilege from those who have it to those who do not These radicals wish to arrange a transfer of power from those elites who now exercise it to another elite namely themselves who do not This aspiring elite is of the same race white the same class upper middle and upper and the same educational background the best colleges and universities as those they wish to displace Wildavsky s bracing work takes a close look at these elites who probably make up little more than one percent of the population He sees their common denominator as hostility toward the masses anti American attitudes derision of authority and a belief in participatory rather than representative politics The author carries through these themes in a variety of essays on black white racial relations social work orientations and black militancy the politics of budgetary reform elite and mass trends in the political party system and the substitution of bureaucratic for democratic modes of advancing the policy process This work is in short vintage Wildavsky tough minded spirited and plain spoken political analysis In his new Introduction Irving Louis Horowitz examines what has changed and what continues to be salient in Wildavsky s line of analysis Essentially the report card on *The Revolt Against the Masses* is that the situation described in these essays has changed somewhat in style but hardly at all in substance The nuclear shield replaces the ABM treaty and Afghanistan replaces Vietnam as centers of political gravity but the same coalition of forces across party and economy still dominate the American political process The justifiably famous essay on *The Two Presidencies* shows how persistent is the gap between the conflict over domestic priorities and the consensus on foreign policy and why This is in short a classic text that continues to merit careful study by all those interested in political life Aaron Wildavsky was until his death in 1993 professor of political science and public policy at the University of California in Berkeley He was also

director of its Survey Research Center He served as director of the Russell Sage Foundation was a president of the American Political Science Association and held a number of visiting professorships during his lifetime Most recently Transaction has posthumously published Wildavsky s complete essays and papers in five volumes Irving Louis Horowitz is Hannah Arendt distinguished university professor emeritus at Rutgers The State University and longtime friend and associate of Aaron Wildavsky

Evaluation in the Planning Process Nathaniel Lichfield, Peter Kettle, Michael Whitbread, 2016-06-07 Evaluation in the Planning Process examines the role of evaluation in the overall planning process and the implications of evaluation for the organization and management of studies Emphasis is placed on the nature of evaluation and the functions it should fulfill in the urban and regional planning process as well as the interrelationships that should exist between evaluation and other planning activities This book consists of 12 chapters organized into three sections The first section focuses on principles governing the use of evaluation in the planning process and includes a model of general urban and regional planning Various methods that are available for evaluating planning proposals are considered with emphasis on the social cost benefit approach and the planning balance sheet method The chapters that follow explore the role of measurement in plan evaluation and review seven planning studies to critically examine UK experience in the application of evaluation methods to urban and regional planning problems This book concludes by presenting the principles and guidelines for the short listing of options and assessing the influence of various practical circumstances on the planning process Some final recommendations on the organization and structure of the planning process and the nature and role of evaluation within it are offered This book is intended for specialists planners and those who are engaged in the task of aiding decisions on urban and regional planning problems This text will appeal especially to those who are concerned with formulating planning processes and with the management of studies
